covered in this book Java Language Features Second Edition starts with a series of chapters on the essential language features provided by Java including annotations reflection and generics These topics are then complemented by details of how to use lambda expressions allowing you to build powerful and efficient Java programs The chapter on threads follows this up and discusses everything from the very basic concepts of a thread to the most advanced topics such as synchronizers the fork join framework and atomic variables This book contains unmatched coverage of Java NIO the Stream API the Path API the FileVisitor API the watch service and asynchronous file I O With this in depth knowledge your data and file management programs will be able to take advantage of every feature of Java s powerful I O framework and much more Additionally three appendices are available for free via the Download Source Code on apress com These appendices will give you a head start on the most important features of Java 10 and the new Java versioning scheme What You ll Learn Use essential and advanced features of the Java language Code Java annotations and inner classes Work with reflection generics and threads Take advantage of the garbage collector Manage streams with the Stream API Who This Book Is For Those new to Java programming and continues the learning Java journey it is recommended that you read an introductory Java programming book first such as Beginning Java Fundamentals from Apress **Java 8** Marty Hall,2013 This video is now available as a 2nd edition For the revised and expanded version go to Java 8 Lambda Expressions and Streams 2nd Edition http ssl safaribooksonline com video programming java 9780134383644 Java 8 Lambda Expressions and Streams covers the most important new features introduced in Java 8 It is presented by Marty Hall bestselling author world renowned instructor and president of the training company coreservlets com This LiveLesson explains the syntax and usage of Java 8 lambda expressions shows the prebuilt functions covers streams thoroughly and gives examples of the types of applications to which lambdas and streams are well suited Lambda expressions are a way of representing functions and Java 8 introduces a number of prebuilt function building blocks as well as a set of function composition methods Although lambda expressions are not quite real functions they are close enough for most purposes and have very succinct syntax that looks like anonymous functions from Scala minus the type declarations and are even moderately similar to JavaScript anonymous functions Streams are wrappers around arrays collections or other data sources that use lambdas pervasively They support many convenient and high performance operations that use lambdas including map reduce filter and forEach They also support lazy evaluation so if you map firstName over a Stream of Employees filter the ones that start with P then choose the first it really only maps and filters until the first match Streams can also be made parallel automatically so that the operations are done in parallel without having to write any explicit multithreading code Lambdas don t exactly turn Java into Lisp and streams don t exactly turn Java SE into Hadoop Nevertheless they provide significant new capabilities to Java and taken together lambdas and streams result in by far the biggest change in Java programming style since at least 2004 when generics and annotations were added to the language Skill Level Intermediate to advanced Who Should Take This Course

Experienced Java developers who need to learn about the new features introduced in Java SE 8 What You Will Learn How to use the most important features of Java 8 lambda expressions and streams Technologies that support lambdas method references lambda building blocks in the java util function package effectively final local variables the FunctionalInterface
