

COGNITIVE TOOLS

Cognitive tools are educational technologies that help students learn. They enable students to think more deeply about a topic or perform at a higher level than we would without them.

DEFINITION

Cognitive tools are “computational tools that can function as intellectual partners of the students, while they are engaged in discovery learning/constructivistic activities.” (Korres, 2019, p. 7) A cognitive tool does not do the thinking for students but provide strategies and guidance to help students to process information more efficiently.

2. Calculators
3. Mind Maps
4. Smart Watches
5. Microworld Games
