FIRE WEATHER: Agriculture Handbook 360 U.S. Department of Agriculture □ Forest Service,2019-07-03 Weather is never static It is always dynamic Its interpretation is an art The environment is in control in wildland firefighting Free burning fires are literally nourished by weather elements atmospheric components and atmospheric motion Outguessing Mother Nature in order to win control is an extremely difficult task We need to soothe her with understanding We have attempted to present information in such a way that your daily and seasonal awareness of fire weather can begin with reliable basic knowledge We have kept the use of technical terms to a minimum but where it was necessary for clear and accurate presentation we have introduced and defined the proper terms Growing awareness of fire weather when combined with related experience on fires can develop into increasingly intuitive rapid and accurate applications Toward this end we have preceded each chapter with a paragraph or two on important points to look for in relating weather factors to fire control planning and action **Atmosphere, Weather, and Climate** Roger Graham Barry,Richard J.
