**The Corporate Responsibility Code Book**  
Deborah Leipziger, 2017-09-08 The Corporate Responsibility Code Book has become the go to guide for companies trying to  
understand the landscape of corporate responsibility and searching for their own unique route towards satisfying diverse  
stakeholders There is no one size fits all approach A company may face quite different challenges if it operates in more than  
one part of the world And yet stakeholders especially consumers and investors are keen for some degree of comparability  
with which they can evaluate corporate performance There are countervailing forces at work within corporate responsibility  
on the one hand is the need for convergence in order to simplify the large numbers of codes and standards and on the other  
hand the need to foster diversity and innovation Many of the best codes of conduct and standards are not well known while  
some CR instruments that are well disseminated are not terribly effective Some comprehensive codes of conduct achieve  
nothing while other quite vague codes of conduct become well embedded into the organization and foster innovation and  
change This landmark book explains the best CR instruments available and distils their most valuable elements In the fully  
revised third edition Deborah Leipziger widens her lens to provide detailed analysis of the UN Guiding Principles on Business  
and Human Rights the Gender Equality Principles and ISO 26000 while updating other key tools such as the Equator  
Principles the OECD guidelines and GRI s new G4 framework The codes in this book cover a wide range of issues including  
human rights labour rights environmental management corruption and corporate governance The book also includes how to  
or process codes focusing on reporting stakeholder engagement and assurance
