**The ASTD E-learning Handbook** Allison Rossett,2002 The

entire training industry is undergoing dramatic change as training is moved out of traditional classrooms and onto the Web. Training publications and conferences are now dominated by speakers, writers, and vendors talking about e-Learning. The e-Learning revolution is forcing companies to spend millions on new technology and new web-based courseware, threatening the role of traditional classroom trainers and saving companies millions of dollars in housing and travel costs because trainees no longer need a plane ticket and 3 nights accommodation to attend a corporate training program; the training can be delivered to each learner's desktop over the Web. But because e-Learning is still in the revolution stage, there are no clear standards and models for how to create and deliver e-Learning successfully. Everyone is asking the same questions: how does web-based training fit in with traditional classroom-based training? What are the standards for designing high-quality e-Learning? How much interaction with an instructor do e-Learning participants need? What is the role of the instructional designer in online learning?

The *ASTD e-Learning Yearbook* will be the first annual reference. *The Quality Yearbook, 2002* James W. Cortada, John A. Woods, 2001-12. This is an annual publication designed as an anthology and reference to keep the people interested in implementing quality management up to date with thoughts and ideas in the field. The topic of distance teaching and online learning, associated technologies, and applications covers a galaxy of ideas, concepts, issues, concerns, and opportunities. Everything from workforce training to accessing education to digital divide issues and the evolution of distance and online education into a multibillion-dollar enterprise is included in the global conversation. Certifications, degrees, workforce training, and lifelong learning are all a part of public and private educational institutions. Partnerships with for-profit businesses, the rise of virtual universities within traditional educational systems, competition with for-profit institutions, and issues of quality are part of the regular workday at national and international educational institutions. *The Encyclopedia of Distance Learning Technologies and Applications*, edited by Patricia Roger, provides a comprehensive coverage of the evolution of distance learning educational programs through distance learning technologies, of distance learning program design and implementation, program delivery methods, distance learning and work force, and assessing effectiveness of distance learning programs. *The Encyclopedia of Distance Learning Technologies and Applications* is an excellent resource for comprehensive knowledge and practices in distance learning programs.
