## **Breaking The Seattle Deadlock:**

**Breaking the Seattle Deadlock** Zhen Kun Wang, L. Alan Winters, 2000 After the failure of the WTO Ministerial meeting in Seattle the immediate priority is to restore good faith and confidence in the WTO This text argues that the developing countries have to be brought much more securely into the trading system with greater attention being paid to their needs

*Negotiating Environmental Change* F. Berkhout, 2003-01-01 The ESRC GEC programme has made a major contribution in terms of environmental social science research The chapters in this book provide incisive detailed and reflective critiques of the development of knowledge over the last ten years and provide powerful and important messages about the challenges presented by the complex relationship between environmental and social change The book should be essential reading for all researchers and also for all policymakers who are grappling with questions about how to respond to environment society controversies Judith Petts Birmingham University UK and Member of the Royal Commission on Environmental Pollution Global environmental change will be with us forever But how it happens in the future and with what effect on the planet and its peoples depends to a large extent on how the international agreements national politics and local actions play out This collection provides the most comprehensive assessment yet of these critical interconnections and reveals how social scientists are making an invaluable contribution to the creation of more science and just livelihoods in a future world Tim O Riordan University of East Anglia UK An aphrodisiac to the tepid response of positivist social science People are not merely actors perpetrators and victims in an environmental drama The critical social theorists in this book constructively show us how people are improvising the stage and the script as we update our understanding of nature what constitutes a good life and our individual and collective options Richard B Norgaard University of California Berkeley US *Negotiating Environmental Change* is a child of the ESRCs Global Environmental Change Programme by far the biggest piece of work by social scientists in the United Kingdom during the 1990s At the beginning of the twenty first century the balance sheet needs to be drawn up what do our policies insights and values owe to the collaborative efforts of social scientists This book suggests that ideas and approaches that were conceived at a time when the Ozone Hole Global Warming and Biodiversity Losses were beginning to resonate in academic and policy circles have now entered the British and European psyche The challenge of forward thinking in the twenty first century in which the environment is central to most of the issues that concern social science is to demonstrate that the environment is not a separate territory Environmental thinking and practice affects us in various guises governance and democracy business and management risk and everyday consumption the substance of this book *Negotiating Environmental Change* makes clear the contribution that new thinking is making to problems that were not looked upon as environmental a decade ago but which we now see as being at the forefront of global research and policy agendas Michael Redclift King s College London UK Major advances have been made recently in environmental social science but the context and importance of this research has also changed Social and natural science

studies of the environment have begun to interact more closely with each other and many analysts now agree that an understanding of environmental problems often depends on an understanding of the attitudes and behaviour of people and organisations. Moreover, policy and public debates have also shown that many assumptions that underpin arguments about sustainable development need to be reconsidered and re-framed. This book by leading researchers presents a critical review of debates in environmental social science over the past decade. Three broad areas are covered in ten chapters: the problems of scientific uncertainty and its role in shaping environmental policy and decisions; the development of institutional frameworks for governing natural resources; and the link between economic and technological change and the environment. The book begins with an overview essay.

**Coherence in International Economic Policy-making** Zhen Kun Wang, 2001. The issue of coherence among international organizations has attracted considerable attention, particularly since the birth of the WTO. The Uruguay Round Declaration recognized the role of trade liberalization in achieving greater coherence in global economic policy making, stating that the WTO shall cooperate with the IMF and the World Bank. This paper explores the origins of the concept of coherence, its evolution after the Uruguay Round, ways in which international organizations can work together, and what coherence should imply from both a general trade policy perspective and a development point of view.

**Editor & Publisher**, 1909 **The Economic Government of the World** Martin Daunton, 2023-11-14. Foreign Affairs Best Books of the Year 2023. An epic history of the people and institutions that have built the global economy since the Great Depression. In this vivid landmark history, the distinguished economic historian Martin Daunton pulls back the curtain on the institutions and individuals who have created and managed the global economy over the last ninety years, revealing how and why one economic order breaks down and another is built. During the Great Depression, trade and currency warfare led to the rise of economic nationalism, a retreat from globalization that culminated in war. From World War II came a new liberal economic order, squarely reflecting the interests of the West. In the Cold War, liberalism faced collapse in the 1970s and was succeeded by neoliberalism, financialization, and hyper-globalization. Now, as leading nations are tackling the fallout from COVID-19 and threats of inflation, food insecurity, and climate change, Daunton calls for a return to a more just and equitable form of globalization. Western imperial powers have overwhelmingly determined the structures of world economic government, often advancing their own self-interests and leading to ruinous resource extraction, debt, poverty, and political and social instability in the Global South. He argues that while our current economic system is built upon the politics of and between the world's biggest economies, a future of global recovery and the reduction of economic inequality requires the development of multilateral institutions. Dramatic and revelatory, *The Economic Government of the World* offers a powerful analysis of the origins of our current global crises and a path toward a fairer international order.
