the media They have been described as the epitome of chanson and of Frenchness But there is more to the trio than a musical trinity this new study examines the factors of cultural and national identity that have held together the myth of the trio since its creation This book identifies the combination of cultural and historical circumstances from which the works of these three singers emerged It presents an innovative analysis of the correlation between this iconic trio and the evolution of national myths that nurtured the cultural aspirations of post war French society It explores the ways in which Brel Brassens and Ferr embody the myth of the left wing intellectual and of the authentic Gaul spirit and it discusses the ambiguous attitude of post war French society towards gender relations The book takes an original look at the trio by demonstrating how it illustrates the popular representation of a key issue of French national identity the paradoxical aspiration to both revolution and the maintenance of the status quo

The Mediating of Chanson Adeline Cordier,2008 Jacques Brel Georges Brassens and L o Ferr are three emblematic figures of post war French song who have been seen by critics journalists and the public as the epitome of chanson and more generally of Frenchness The starting

point of this study is the observation that the legacy of the systematic association of Brel Brassens and Ferr crystallised in Cristianini's 1969 interview and in Jean Pierre Leloir's photograph of the interview has enjoyed a prosperity which seems disproportionate to the actual relevance of the comparison between the three artists. In 1969 the three singers were significant figures of French song but they were not the only ones. Bringing them together was therefore a promise of media success but it was in no way expected to start a legend and yet the myth of the interview has today taken over its reality to the extent that the *Com die Fran aise* is presently almost thirty years later turning it into a play which was staged in May 2008. The photograph of the three singers smoking and drinking around a table is today and for a vast majority of people the only thing that they know about the famous interview if not about the singers. The lack of obvious grounds to justify the exclusivity of the trio suggests that there is more to it than a musical trinity. By taking into consideration the oral dimension of song, the socio-cultural context in which the trio emerged and the mediation of their celebrity, this study aims to identify the factors of cultural and national identity that have held together the myth of the trio since its creation. Besides shedding new light on the significance of the three artists individually, this study proposes to demonstrate that each singer embodies qualities with which the French people likes to be associated and that the trio Brel Brassens Ferr can therefore be seen as an arbitrary sketch of a certain Frenchness. In particular, this thesis focuses on the trio illustrating the popular representation of a key issue of French national identity, the paradoxical aspiration to both revolution and the status quo. By taking the cultural icon Brel Brassens Ferr as a case study through which to address questions of popular and national identity, this study contributes to cultural studies in two different ways. Firstly, through theorising the implications of the oral dimension of songs, it demonstrates the necessity of taking into consideration factors such as performance, the media and the socio-historical context when studying artists as societal phenomena. Secondly, it evidences the importance of the study of forms of popular culture such as iconic singers or music when investigating the ways in which a society perceives its own national identity.
