Doomsday Report:

India's Nuclear Bomb and National Security Karsten Frey, 2007-01-24 Karsten Frey gives an analytic account of the dynamics of India's nuclear build up putting forward a new comprehensive model which goes beyond the classic strategic model of accepting motives of arming behaviour and incorporates the dynamics in India's nuclear programme

Outlaw Territories Felicity D. Scott, 2016-05-20 *Outlaw Territories* Environments of Insecurity Architectures of Counterinsurgency traces the relations of architecture and urbanism to forms of human unsettlement and territorial insecurity during the 1960s and 70s Investigating a set of responses to the growing urban unrest in the developed and developing worlds *Outlaw Territories* revisits an era when the discipline of architecture staked out a role in global environmental governance and the biopolitical management of populations Felicity D Scott demonstrates how architecture engaged the displacement of persons brought on by migration urbanization environmental catastrophe and warfare and at the same time how it responded to the material environmental psychological and geopolitical transformations brought on by postindustrial technologies and neoliberal capitalism after World War II At the height of the US led war in Vietnam and Cambodia and ongoing decolonization struggles in many parts of the world architecture not only emerged as a target of political agitation on account of its inherent normativity but also became heavily imbricated within military legal and humanitarian apparatuses and scientific and technological research dedicated to questions of international management and security Once architecture became aligned with a global matrix of forces concerned with the environment economic development migration genocide and war its conventional role did not remain unchallenged but shifted at times toward providing strategic expertise for institutions responding to transformations born of neoliberal capitalism *Outlaw Territories* interrogates this nexus and questions how and to what ends architecture and the environment came to be intimately connected to the expanded exercise of power within shifting geopolitical frameworks of this time

Reports and Papers Associated Architectural Societies, 1893 [The Outlook](#), 1920 [Doomsday's Last Revenge](#), **Climate Fiction and Cultural Analysis** Gregers Andersen, 2019-09-25 *Climate Fiction and Cultural Analysis* argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds

not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
