Code Mobius:

Mobius' Code Francis Rosenfeld,2018-03-24 What can you say about a girl who was supposed to die tragically young That her guardian angel got distracted while writing her life code and inadvertently sent her into an infinite loop a quantum uncertainty of sorts packed with bonus features This sort of stuff can create minor issues for the rest of Creation issues which of course need to be ironed out but there is nothing that can't be fixed with good team spirit and a can do attitude especially if you're not unreasonably inflexible about the laws of physics Don't worry about breaking reality you can always make yourself another one or several and improve the quantum efficiency of the electromagnetic spectrum in the process Still in beta testing

Geometries, Codes and Cryptography G. Longo,M. Marchi,A. Sgarro,2014-05-04 The general problem studied by information theory is the reliable transmission of information through unreliable channels Channels can be unreliable either because they are disturbed by noise or because unauthorized receivers intercept the information transmitted In the first case the theory of error control codes provides techniques for correcting at least part of the errors caused by noise In the second case cryptography offers the most suitable methods for coping with the many problems linked with secrecy and authentication Now both error control and cryptography schemes can be studied to a large extent by suitable geometric models belonging to the important field of finite geometries This book provides an update survey of the state of the art of finite geometries and their applications to channel coding against noise and deliberate tampering The book is divided into two sections Geometries and Codes and Geometries and Cryptography The first part covers such topics as Galois geometries Steiner systems Circle geometry and applications to algebraic coding theory The second part deals with unconditional secrecy and authentication geometric threshold schemes and applications of finite geometry to cryptography This volume recommends itself to engineers dealing with communication problems to mathematicians and to research workers in the fields of algebraic coding theory cryptography and information theory

The Möbius Strip Topology Klaus Möbius,Martin Plato,Anton Savitsky,2022-11-30 In the 19th century pure mathematics research reached a climax in Germany and Carl Friedrich Gauss 1777 1855 was an epochal example August Ferdinand Möbius 1790 1868 was his doctoral student whose work was profoundly influenced by him In the 18th century it had been mostly the French school of applied mathematics that enabled the rapid developments of science and technology in Europe How could this shift happen It can be argued that the major reasons were the devastating consequences of the Napoleonic Wars in Central Europe leading to the

total defeat of Prussia in 1806 Immediately following far reaching reforms of the entire state system were carried out in Prussia and other German states also affecting the educational system It now guaranteed freedom of university teaching and research This attracted many creative people with new ideas enabling the golden age of pure mathematics and fundamental theory in physical sciences M bius legacy reaches far into today s sciences arts and architecture The famous one sided M bius strip is a paradigmatic example of the ongoing fascination with mathematical topology This is the first book to present numerous detailed case studies on M bius topology in science and the humanities It is written for those who believe in the power of ideas in our culture experts and laymen alike

Formal Methods for Components and Objects Marcello M. Bonsangue, Susanne Graf, Willem-Paul de Roever, 2008-12-01 Formal methods have been applied successfully to the verification of medium sized programs in protocol and hardware design However their application to the development of large systems requires more emphasis on specification modelling and validation techniques supporting the concepts of reusability and modifiability and their implementation in new extensions of existing programming languages like Java The 6th International Symposium on Formal Methods for Components and Objects FMCO 2007 was held in Amsterdam The Netherlands in October 2007 This book presents 12 revised papers submitted after the symposium by the speakers of each of the following European IST projects the IST FP6 project Mobius developing the technology for establishing trust and security for the next generation of global computers the IST FP6 project SelfMan on self management for large scale distributed systems based on structured overlay networks and components the IST FP6 project GridComp and the FP6 CoreGRID Network of Excellence on grid programming with components the Real time component cluster of the Network of Excellence on Embedded System Design ARTIST focussing on design processes and architectures for real time embedded systems and the IST FP6 project CREDO on modeling and analysis of evolutionary structures for distributed services

Walking the Möbius Strip Johanna Heil, 2016 Walking the Mobius Strip locates Richard Powers s fiction at the crossroads of postmodern and post postmodern aesthetics and argues that this paradigm shift shapes the models of knowledge and understanding that underwrite his work The readings of *Plowing the Dark* *Galatea 2 2* and *The Echo Maker* are inspired by Jacques Lacan s image of cognition as a Mobius strip on which different forms of propositional and non propositional knowledge bleed into and depend upon one another Drawing on

feminist epistemology and psychoanalysis this study highlights Powers's interest in the non propositional aspects of cognition that is in all that escapes the frameworks of scientific empiricism and can only be known through the mediation of fictional narrative It reveals a deep dissatisfaction in the novels with the suggestion that knowledge and understanding must be objective and rational and elucidates Powers's idea that fiction can be a powerful tool for integrating various kinds of knowledge
