Parliament. House of Commons,1915 **The New Cushing's Manual of Parliamentary Law and Practice, According to Present American Usage** Luther Stearns Cushing,1912 *Senate documents* ,1893 The Pragmatic Programmer for Machine Learning Marco Scutari, Mauro Malvestio,2023-03-31 Machine learning has redefined the way we work with data and is increasingly becoming an indispensable part of everyday life The Pragmatic Programmer for Machine Learning Engineering Analytics and Data Science Solutions discusses how modern software engineering practices are part of this revolution both conceptually and in practical applications Comprising a broad overview of how to design machine learning pipelines as well as the state of the art tools we use to make them this book provides a multi disciplinary view of how traditional software engineering can be adapted to and integrated with the workflows of domain experts and probabilistic models From choosing the right hardware to designing effective pipelines architectures and adopting software development best practices this guide will appeal to machine learning and data science specialists whilst also laying out key high level principles in a way that is approachable for students of computer science and aspiring programmers **North Central Association Quarterly** ,1927 The official organ of the North Central Association of Colleges and Schools called earlier North Central Association of Colleges and Secondary Schools **Opportunism in supplier-buyer relationships** Sebastian Schulte,2007-01-11 Inhaltsangabe Abstract In 1996 managers of U S based automaker Ford Corporation realized that they had been fooled The decision to allocate the company s seat construction to the single supplier Lear Corporation had turned out to be a disaster Lear had made unrealistic promises concerning their engineering talent in order to get into business with the major carmaker As Ford was locked in with a supplier that was unable to keep deadlines and that produced parts that did not work the production and on time launch of the 1996 version of Ford Taurus were severely put at risk In this industry example the supplier behaved opportunistically towards the buyer by misrepresenting the true skills of its employees According to Transaction Cost Economics TCE opportunism is considered as an endogenous factor it forms an inherent part of business relationships

Following Williamson's explanation opportunism is one of the rudimentary attributes of human nature. Whenever individuals will be given the chance to act opportunistically they will do so. However, taking a look at current literature, the classical view of opportunism as a ubiquitous phenomenon becomes unsustainable. The emergence and degree of opportunistic behaviour is influenced by a variety of antecedent factors such as institutional environment, e.g. competition, technology, or social determinants of behaviour, e.g. commitment, trust. Psychological research on this topic has shown that TCE lacks an explicit distinction between opportunism as an attitude and as a type of behaviour or action. Whether an agent behaves opportunistically or not does not only depend on his inclination towards carrying out unfair business practices but also on the incentives that are given to him. Furthermore, recent approaches drawing on Agency Theory have replaced the traditional model of a self-serving man by an agent showing cooperative behaviours as described in Stewardship Theory. In his original version of TCE, Williamson relied on vertical integration as an effective governance mechanism to attenuate opportunism and to safeguard specific investments. Transactions with high asset specificity should be governed by hierarchy mechanisms that are not accessible to markets such as intensive monitoring or incentive structures. As a result, transaction costs would be minimized. In fact, hierarchical controls should not be treated as a universal remedy to curtail unfair business practices.
