Cartesian Questions:

Cartesian Questions III Jean-Luc Marion, 2025-08-05 In this masterful work Jean Luc Marion shows how some of Descartes most decisive points remain masked by the various Cartesianisms that historiography and convenient simplifications alike have constructed The book s first half shows how Descartes lines up against Cartesianism setting forth several closely argued attempts to free up the positive status of skepticism in the Cartesian corpus the non substantial and non reflexive character of the ego cogito the complex elaboration of the idea of the infinite and the role of esteem as a mode of the cogitatio Marion then offers a second set of studies examining the work of Montaigne Hobbes and Spinoza and seeking to reconstitute some of the ways in which Cartesianism and non Cartesianism become opposed to Descartes Arising at the pivot point between these two paths of inquiry is a chapter dedicated to Descartes and phenomenology with particular focus on how Descartes can be understood to have practiced in his own way and by anticipation a genuine phenomenological reduction The final volume in Jean Luc Marion s erudite trilogy of Cartesian Questions this authoritative book demonstrates that rather than belonging strictly to the past Descartes continues to speak to our future

Cartesian Questions Jean-Luc Marion, 1999-04-15 Jean Luc Marion is one of the most prominent young philosophers working today and one of the best contemporary Descartes scholars Cartesian Questions his fifth book on Descartes is a collection of seven essays on Descartes method and its relation to his metaphysics Marion reads the philosopher s Discourse on Method in light of his Meditations examining how Descartes metaphysics changed from one book to the other and pursuing such questions as the status of the ontological argument before and after Descartes The essays touch on the major themes of Marion s career including the connection between metaphysics and method the concept of God and the constitution of the thinking subject In their range the essays are an excellent introduction to Marion s thought as well as a subtle and complex interpretation of Descartes The collection is a crucial work not only for scholars of Descartes but also for anyone interested in the state of contemporary French philosophy Besides the impact of their content the clarity and reach of these essays force one to consider foundational questions concerning philosophy and its history Richard Watson Journal of the History of Philosophy

An Actology of the Given Malcolm Torry, 2023-08-03 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition is a conceptual structure characterized by action change and diversity and that envisages reality as action in changing patterns The previous book in this series Actological Readings in Continental Philosophy reads a number of continental philosophers through this lens This new book An Actology of the Given takes a somewhat different approach it explores the concepts of the gift givenness giving and other cognates in the light of reality understood as action in patterns rather than as beings that change and it does so by discussing some anthropology the writings of a number of continental philosophers biblical texts social policy and a variety of other givens

Miner, 2013-02-01 Is knowing a purely passive reception of something concrete outside the mind or when we know something are we creating something too Spanning more than 500 years of philosophical enquiry from the Middle Ages to the present day Robert Miner clarifies modern philosophical conceptions of knowing as making or constructing and contrasts this view with the theological understanding of knowing as a participation in divine creation This study demonstrates how creative knowledge has its roots in the theologies of Thomas Aquinas and Nicholas Cusanus It explores the multiple ways in which this idea influenced the architects of modern philosophy most notably Francis Bacon Ren Descartes and Thomas Hobbes despite their secular stance Miner contends that well in advance of Kant one of these thinkers Gaimbattista Vico provided a remarkably succinct formulation of the metaphysical and epistemological core of modernity in his principle verum et factum convertuntur the true and the made are convertible In Truth in the Making Robert Miner challenges the standard assumption that Kant was the first thinker to conceive of knowing as constructive activity and shows how contemporary theology can reclaim a concept of knowing that is both creative and participant in divine wisdom
