Basic Questions On Truth:

Basic Questions of Philosophy Martin Heidegger, 1994-06-22 This excellent translation presents Heidegger's mature thought on the essence of Truth as he was writing his major work *Contributions to Philosophy* Library Journal This is the first English translation of a lecture course Martin Heidegger presented at the University of Freiburg in 1937-1938 Heidegger's task here is to reassert the question of the essence of truth not as a problem or as a matter of logic but precisely as a genuine philosophical question in fact the one basic question of philosophy Thus this course is about the essence of truth as well as the essence of philosophy itself On both sides Heidegger draws extensively upon the ancient Greeks on their understanding of truth as *aletheia* and their determination of the beginning of philosophy as the disposition of wonder In addition these lectures were presented at the time that Heidegger was composing his second magnum opus *Beiträge zur Philosophie* and provide the single best introduction to that complex and crucial text *Nietzsche and the Question of Interpretation* Alan Schrift, 2014-02-25 The first attempt at assessing the references to interpretation theory in the Nietzschean text

Basic Questions in Theology Wolfhart Pannenberg, 1971 **The Quest for Excellence** Dustin Gish, Chris Constan, J. Scott Lee, 2016-08-25 Liberal education aspires to excellence through the cultivation of free human beings who excel in thought word and deed But what exactly is excellence and why do we admire it How do we conceive of what is excellent What constitutes excellence either for human beings or in the realms of philosophy literature science and politics Why is excellence an aim of liberal education What kinds of texts courses and inquiries contribute to achieving this end Such questions animate the studies herein The essays in this volume reflect on the idea of excellence embedded within core texts as well as how such texts influence and ennoble higher education In its chapters we consider rival forms of excellence from ancient Greece and Rome through modern Europe and America and beyond The world of antiquity and its accounts of excellence as represented in the works of Euripides Aristotle Plato Archimedes and Cicero are here brought into dialogue with diverse modern perspectives on excellence as articulated by Shakespeare Descartes Newton Locke Rousseau Kant Austen Darwin Lincoln Tennyson and Nietzsche as well as more recently by John Dewey Martin Luther King Jr Cardinal Newman and Eboo Patel Our desire to seek and understand excellence transcends borders and the purpose of this volume is to help perpetuate in contemporary higher education the study of core texts essential to the cultivation of excellence in the liberal arts and sciences

Beyond Foundationalism Stanley James Grenz, John R. Franke, 2001-01-01 Grenz and Franke provide a methodological approach for doing theology in the postmodern world They call for a theological method that moves beyond the Enlightenment way of ordering and understanding information foundationalism They propose a theological method that takes seriously the Spirit tradition and contemporary culture while stressing trinitarian structure community and eschatology

Shattering Silos Lambert Zuidervaart, 2022-08-15 Questions first raised by Hannah Arendt in the 1960s take on new urgency in the post truth era as political leaders blithely reject facts in the public domain Is truth politically impotent Are

politics inherently false Is the search for truth still relevant Shattering Silos a companion volume to Religion Truth and Social Transformation and Art Education and Cultural Renewal provides a path breaking response As in his two previous books Lambert Zuidervaart challenges the boundaries philosophers set up between epistemology ethics and political philosophy Knowledge he argues takes different forms in various social domains and all are subject to political struggle A critique of contemporary society must draw on many social domains of knowledge including the arts and religion and should recast politics as a striving for truth in the broadest sense Proposing a new conception of truth one that emphasizes the unity of knowledge and truth as well as their diversity among different social domains Zuidervaart asks what such holism and pluralism suggest about how we understand politics and society This book proposes a new understanding of large scale social change challenging how most people think about knowledge and truth Interweaving epistemology social criticism and political thought Shattering Silos aims to help redirect an allegedly post truth society
