Approaches to Development John Dickey Montgomery,William J. Siffin,1966      *The Dynamics of Development and Development Administration* Kempe R. Hope,1984-06-19 Kempe Ronald Hope provides for the first time a clear analysis and synthesis of economics and development administration as well as an appraisal of the problems associated with the application of these concepts in Third World nations Combining both theory and practice and providing concrete examples Hope begins by detailing the evolution of the concept of development from the inter war years through the 1950s when the expression Third World first emerged to the 1970s and the present when wholesale technology transfer and other new approaches emphasizing economic independence began to take precedence The chapters that follow chart the history of modern development administration focusing on important issues such as the role of the development administrator in the implementation of public policy the function of the public servant versus that of the politician bureaucracy in government and the increasing need for technical personnel to carry out development policies

**Urban and Regional Development Planning** Dennis A. Rondinelli,2019-06-30 Widely accepted principles and

assumptions of American planning theory come under heavy fire in this refreshing and provocative book. The author's main contention is that contrary to current supposition, development planning is in practice a highly political activity. Professor Rondinelli maintains that it is because the dynamics of the policy making process are not properly understood that current planning prescriptions are inadequate when they are applied within organizationally complex urban regions. To illustrate his argument, he offers a case history of federally aided redevelopment programs for an urban region in northeastern Pennsylvania that experienced three decades of economic decline. He further believes that existing programs of planning education do not provide the skills, knowledge, and experience necessary for effective management of urban change. Curricula must be reoriented, he says, if planners are to have an impact on future urban and regional development. Finally, he sets forth positive alternatives to current planning processes, stressing the need for planning theory and practice that recognize and cope with the characteristics of the complex policy making system.

The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge.
