

LINK BETWEEN EDUCATION AND DEVELOPMENT

Education, whether formal, informal and/or non-formal, through change in knowledge, behaviour and practices, brings development. Education is an investment which brings development in the long run. The solution to all problems related to the economy, development, or population lies in education.

Education plays a critical role in development of any country, including the developing countries. It is a crucial factor in development of any country particularly in today's current age of globalization. The aim of development is to ensure high standards of living for the people of a given country and in general the entire world. When people's standard of life significantly improves, they are able to effectively participate in the development of their countries and their regions. In assessing the role of education in development, one however needs to consider the key concerns of access to education, equality in education, financing and opportunities associated with education. Developing countries, unlike their developed counterparts continue to face a number of challenges in the provision of education to the citizens particularly in the current day and age where universalization of education has taken center stage with the adoption of global measures like the United Nations Millennium Development Goals (MDGs) whose realization the world nations aim to be 2015 and the provisions of the World Declaration on Education for all.

The linkage of education to development can be seen right from the experiences of developed nations which started realizing higher growth in their incomes with significant investment in education, skills and knowledge for the people. No country in the world has attained high development and growth without undertaking significant investments in the education sector.

Human capital formation entails those countries must undertake to not only formulate and implement relevant policies, but also take relevant measures to enhance investment in the sector. Globally, the key trends viewed in the education sectors of all countries can be summarized as follows:

- ❖ Public education is the predominant form of education. The government is therefore the major player in this sector and it is charged with the responsibility of funding, policy direction, regulation and legislation.
- ❖ Richer countries invest significantly more resources per pupil than poor countries. They apportion higher funds to the education sector and in many countries, universal education has been attained or education is provided at a highly subsidized rate by the government.
- ❖ Schooling attainment increases with income and differs significantly across countries.

Despite education being a crucial element for development, the World Declaration on Education for All highlights key glaring realities touching on education globally. These:

- ❖ More than 100 million children including at least 60 million girls have no access to primary schooling.
- ❖ More than 960 million adults, two-thirds of whom are women are illiterate. Functional illiteracy is a significant problem in all countries; industrialized or developing.
- ❖ More than one-third of the world's adults have no access to the printed knowledge, new skills
