The Law Code of Hammurabi Saad D. Abulhab, 2017-12-15 This book which includes new translations of the old Babylonian laws of Hammurabi is the second book by the author examining from a historical Arabic linguistic perspective a major Akkadian document The first book offered new translations of three tablets from a literary work the Epic of Gilgamesh written in a late Babylonian language The pioneering methodology used by the author to decipher the ancient Mesopotamian texts in both documents involves the primary utilization of old etymological Arabic manuscripts written by hundreds of accomplished scholars more than a thousand years ago Using this methodology does not only provide more accurate non-speculated translations and preserve the spirit and linguistic style of the original texts but also provides more realistic phonetic values of the cuneiform signs This would result in having more realistic overall text readings suitable to the one geographical and historical environment where these texts were produced namely the greater Arabian Peninsula The text of the Hammurabi stele offers students of both Arabic and Assyriology a perfect and unique opportunity to identify the language and grammar of its ancient Arabic language Its vocalizations of subjects objects verbs and genitives are astonishingly identical to that of classical Arabic The loose and sometimes chaotic placement of words in sentences is strikingly identical to that of pre-Islamic Arabic In fact the older the formal Akkadian language it seems the clearer its Arabic identity Offering a textbook reference value the author provided the numbered phonetic Latin transcription for each law right above its corresponding numbered Arabic transcription Furthermore he translated the text of each law literally into Arabic and English to illustrate how its translation was concluded and to preserve its overall linguistic style accounting for every word in its actual text For easier reading experience a full subject guide to the laws of Hammurabi is provided All reference entries from both the historical Arabic manuscripts and the modern dictionaries of Assyriology are also provided in the appendix In his expanded introduction the author discussed the layout script and language of the Hammurabi code stele in the Louvre and through the evidence of Hammurabi's own words in a key paragraph in his prologue he offered the possible meanings of the nickname Hammurabi

Object-oriented Concurrent Programming Akinori Yonezawa, Mario Tokoro, 1987 This book deals with a major theme of the Japanese Fifth Generation Project which emphasizes logic programming parallelism and distributed systems It presents a collection of tutorials and research papers on a new programming and design methodology in which the system to be

constructed is modeled as a collection of abstract entities called objects and concurrent messages passing among objects. This methodology is particularly powerful in exploiting as well as harnessing the parallelism that is naturally found in problem domains. The book includes several proposals for programming languages that support this methodology as well as the applications of object oriented concurrent programming to such diverse areas as artificial intelligence software engineering, music synthesis, office information systems, and system programming. It is the first compilation of research results in this rapidly emerging area.

Contents: Concurrent Programming Using Actors; Concurrent Object Oriented Programming in Act 1; Modelling and Programming in a Concurrent Object Oriented Language ABCL 1; Concurrent Programming in ConcurrentSmallTalk Orient84K; An Object Oriented Concurrent Programming Language for Knowledge Representation POOL T; A Parallel Object Oriented Programming Language Concurrent Strategy Execution in Omega; The Formes System; A Musical Application of Object Oriented Concurrent Programming; Distributed Problem Solving in ABCL 1.
