Velmosky, 2019-08-12 *Culturally Tailored Behavior Based Safety* By David W. Velmosky. Every employer wants to maintain workplace safety. However, too often, employers think they need to hire expensive outside help to create and sustain safety. David W. Velmosky knows this isn't true, and in *Culturally Tailored Behavior Based Safety*, he outlines how to create a worker consensus based safety design that is effective for your facility. *Culturally Tailored Behavior Based Safety* is a method that uses input from employees at all levels. Your workplace, your employees are unique, your workplace safety must be unique as well. Thorough research of each individual facility's culture will give you insight on what the safety solutions are. Corporate leadership needs to develop a democratic approach with facility leadership and workers. When workers feel like they own the safety of their facility and it fully reflects their culture, they will be more engaged in safety. By keeping an open mind and using a positive, cooperative problem-solving team approach, your facility can not only decrease but eliminate workplace accidents. Velmosky stresses flexibility and common sense to create a safety blueprint. Real life examples will encourage you to implement targeted safety procedures. *Culturally Tailored Behavior Based Safety* provides detailed instructions on how to design, communicate, and implement a safety program that will work for your facility. Workplace accidents are not acceptable, nor are they inevitable.
