*How Animals Help Students Learn* Nancy R. Gee, Aubrey H. Fine, Peggy McCardle, 2017-03-27 *How Animals Help Students Learn* summarizes what we know about the impact of animals in education and synthesizes the thinking of prominent leaders in research and practice It s a much needed resource for mental health and education professionals interested in incorporating animals in school based environments one that evaluates the efficacy of existing programs and helps move the field toward evidence based practice Experts from around the world provide concrete examples of how animals have been successfully incorporated into classroom settings to achieve the highest level of benefit while also ensuring the health and welfare of the students and animals involved **Animals in Education** Joanne Dade, 1988-01-01

**Animals in Education** Lisa Ann Hepner, 1994 **The Role of Animals in Elementary Education: A Pilot Study** Daniel A. Denoon, AIR FORCE INST OF TECH WRIGHT-PATTERSON AFB OHIO., 1978 Interviews with twenty teachers in elementary schools indicated thirteen had used animals in their classrooms Hampsters gerbils and fish were the most frequently used species Seven teachers kept animals primarily for observation and pleasure Other uses included teaching responsibility sex education and biological experiments Three teachers had drawn on published background information for educational uses of animals and five had consulted animal care books for care and feeding Potential zoonotic disease transmission was considered by two teachers Non use of animals was attributed to the lack of published teacher guides the potential for increased personal liability due to animal bites and zoonotic disease transmission the lack of knowledge for care and feeding mess odor and the problem of animal care during holidays Author *Animals in the Classroom* David C. Kramer, 1989 A sourcebook for elementary and middle school teachers interested in keeping a variety of small animals in the classroom Intended to encourage teachers to stimulate student curiosity and interest in learning about animals by keeping live animals in the classroom Assists teachers in selecting appropriate classroom animals and caring for them in a humane way Provides information to allow teachers to answer students questions and to provide meaningful learning experiences with a variety of classroom animals Includes information on 28 different animals ranging from worms to mammals worms mollusks arthropods fish amphibians reptiles birds mammals Schizoanalysis and Animal Science Education Helena Pedersen, 2019-02-07 Within the education system acts of violence toward animals take place and are manifested on a routine basis in science classes in lecture halls in school canteens and during study visits to zoos farms and slaughterhouses Taken for granted as necessary for teaching and learning this violence profoundly affects animals as well as students It also provides new entry points for understanding education as a multispecies power regime driven by numerous other investments than knowledge dissemination alone What then is the nature of this educational violence and how exactly does education work through techniques of interference with student and animal bodies Based on ethnographic research within upper secondary schools and higher education this book challenges the use of animals in education by innovative

engagement of Deleuze and Guattari's tool of schizoanalysis Sparking a fundamental rethinking of educational processes relations and aims the book explores how scientific knowledge about animals proliferates through complex interplay of power and desire in contested spaces of teaching and learning Configuring animal science education as a set of machines working in tandem with the animal industry Helena Pedersen offers radical new insights into how education forms subjectivities and social orders under conditions of capitalist expansion that capture students and animals alike Bringing together education studies science studies critical animal studies and continental philosophy Pedersen also provides examples of disruptive action that can put education to work for transformation and liberation

**Learning Animals** Nadine Dolby, 2022-03-15 We are surrounded by thousands of animals alive and dead They are an intimate and ever present part of our human lives As a society we privilege veterinarians as experts on these animals they are our educators and teachers in what they say what they do and the decisions that they make Yet within the field of education there is little research on the curriculum pedagogy and experiences of veterinary school and students What do veterinarians learn in veterinary school How do their experiences during those four years shape their perceptions of animals How do the structures curriculum and pedagogy of veterinary college create and influence these experiences Learning Animals opens up this conversation through an exploration of the complicated fascinating and often painful stories of a cohort of veterinary students as they make their four year journey from matriculation through graduation The book examines how the experiences of veterinary students shape how humans relate to animals from public policy and decision making about the environment and animals slaughtered for food to the most personal decisions about euthanizing companion animals The first full length critical qualitative study of the perspectives of our primary teachers about animals this will be a thought provoking read for those in the fields of both educational research and veterinary education
