authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are  
comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in  
this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends  
beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general  
Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of  
sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used
