that a communication system should be seen as an integrated whole that in reality is something that is more than the sum of its parts It is common knowledge that the communication also takes place via the trading of signals this fact is not a well guarded secret It is possible for information to come from a wide variety of sources including both people and computers Additionally the display of messages may take on a number of various shapes depending on the context in which they are being received On the other hand there are not just one but two separate types of message categories digital and analogue
