## **Countryside Planning:**

**Planning and the Rural Environment** Joan Davidson, Gerald Wibberley, 2016-04-20 Planning and the Rural Environment examines the environmental issues affecting countryside planning. Emphasis is placed on the look and feel of the open countryside, the function and appearance of the rural environment rather than the problems of its people and the settlements in which they live. Also discussed is the conflict of interest generated between some of the major planning systems concerned with the development of rural activities and the protection of rural resources. Comprised of 13 chapters, this volume begins with an assessment of conflicting views of how a countryside of the future should develop and the degree of control and direction that should take place. The following chapters consider how the emerging range of environmental problems and opportunities in rural planning can best be illustrated. In particular, the dominance of agriculture as a rural activity is analyzed together with forest and woodland management, leisure activity in the countryside and conservation of resources and wildlife. The next section is devoted to uplands and the urban fringe, paying particular attention to some of the ways in which rural interests interact in two very different areas. Finally, the development of rural planning is reviewed and issues that are expected to shape the countryside of the future are considered. This book should be of interest to postgraduate students of rural planning and specialists in various fields of countryside planning. *Countryside Planning* Andrew Gilg, 2002-11 Countryside Planning is an in-depth and authoritative introduction to rural issues and addresses key issues such as planning for agriculture and natural environment, countryside management, forestry and the built environment.

**Introduction to Rural Planning** Nick Gallent, Iqbal Hamiduddin, Meri Juntti, Sue Kidd, Dave Shaw, 2015-06-30 Introduction to Rural Planning: Economies, Communities and Landscapes provides a critical analysis of the key challenges facing rural places and the ways that public policy and community action shape rural spaces. The second edition provides an examination of the composite nature of rural planning which combines land use and spatial planning elements with community action, countryside management and the projects and programmes of national and supra-national agencies and organisations. It also offers a broad analysis of entrepreneurial social action as a shaper of rural outcomes with particular coverage of the localism agenda and Neighbourhood Planning in England. With a focus on accessibility and rural transport provision, this book examines the governance arrangements needed to deliver integrated solutions spanning urban and rural places. Through an examination of the ecosystem approach to environmental planning, it links the procurement of ecosystem services to the global challenges of habitat degradation and loss, climate change and resource scarcity and management. A valuable resource for students of planning, rural development and rural geography. Introduction to Rural Planning aims to make sense of current rural challenges and planning approaches, evaluating the currency of the rural label in the context of global urbanisation, arguing that rural spaces are relational spaces characterised by critical production and consumption tensions. *Introduction to Rural Planning* Nick Gallent, Meri Juntti, Sue Kidd, Dave Shaw, 2008-01-14 Providing an overview

of rural spatial planning for students on planning geography and related programmes this book charts the major patterns and processes of rural change affecting the British countryside its landscape its communities and its economies in the twentieth century The authors examine the role of planning in shaping rural spaces not only the statutory comprehensive planning that emerged in the post war period but also planning and rural programme delivery undertaken by central regional and local policy agencies The book is designed to accompany a typical teaching programme in rural planning and considers the nature of rural areas and the emergence of statutory planning in England the agents of rural policy delivery and the potential for current planning practice to become a policy hub at the local level co ordinating the actions and programmes of different agents economic change in the countryside and the influence planning has in shaping rural economies social change the nature of rural communities and recent debates on housing and rural service provision environmental change the changing fortunes of farming landscape protection and the idea of a multi functional landscape made by forces that can be shaped by the planning process key areas of current concern in spatial rural planning including debates surrounding city regions the rural the challenge of managing rural change in the twenty first century through new planning and governance processes A comprehensive coverage of the forces processes and outcomes of rural change whilst keeping planning s influence and role in clear view at all times
