Science and Technology Blaise Cronin, 2004 ARIST published annually since 1966 is a landmark publication within the information science community. It surveys the landscape of information science and technology providing an analytical, authoritative and accessible overview of recent trends and significant developments. The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives. While ARIST continues to cover key topics associated with classical information science e.g. bibliometrics, information retrieval, editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities.

HCI Beyond the GUI Philip Kortum, 2008-04-25 Traditional interfaces rely on graphic depictions and sight to convey information and respond to the user. These are known as graphical user interfaces (GUIs). But designers must meet the challenge of designing new and creative interfaces that adapt to meet human needs on every level of the five senses.

Eye, 2004 **Interaction Design** Helen Sharp, Yvonne Rogers, Jenny Preece, 2007-03-23 This edition includes new features such as completely updated to include new chapters on Interfaces, Data Gathering and Data Analysis and Interpretation, the latest information from recent research findings and new examples, now in full colour, a lively and highly interactive Web site that will enable students to collaborate on experiments, compete in design competitions, collaborate on designs, find resources and communicate with others, and a new practical and process oriented approach showing not just what principals ought to apply but crucially how they can be applied. The best basis around for user centered interaction design both as a primer for students as an introduction to the field and as a resource for research practitioners to fall back on. It should be labelled start here.
