competitive equilibrium to be kept in balance but as an ongoing economic process through which the material needs of its human participants are to be met Although insitutional economics represents a major and growing body of work it has not always been clear how it differs from other approaches In his new book Allan Gruchy considered the dean of institutional economics addresses this problem Pointing up the underlying unity of work done in this field he provides a clear basic statement of what it is all about and what intellectual and social currents have shaped it **Land Reform, Land**
