Developing Digital Architecture Yu-Tung Liu, Yudong Liu, 2003-01-01 The Far Eastern International Digital Design Award FEIDAD was conferred for the first time in 2000 its aim being to encourage and honour innovative design created with the aid of digital media In 2002 the jury which comprised Greg Lynn William Mitchell MIT Gerhard Schmitt Swiss Federal Institute of Technology Nobuyuki Yoshida A U Birger Sevaldson OCEANnorth and other distinguished architects awarded the prize for the third time This book presents the 67 best projects which architects students and designers coming from 26 different countries had entered in the competition Each project is fully documented in text with numerous colour illustrations The new features of this year are several awarded animation projects which explore future space in the digital era these are products of the collaboration among different groups of artists graphic designers product designers computer scientists video game designers film designers and sci fi novelists This documentation of these projects offers an excellent overview of the very latest developments in digital design through provoking and imaginative it provides valuable insight for all who make use of new media in their work Back cover Developing Digital RF Memories and Transceiver Technologies for Electromagnetic Warfare Phillip E. Pace, 2022-05-31 This book provides a comprehensive resource and thorough treatment in the latest development of Digital RF Memory DRFM technology and their key role in maintaining dominance over the electromagnetic spectrum Part I discusses the use of advanced technology to design transceivers for spectrum sensing using unmanned systems to dominate the electromagnetic spectrum Part II uses artificial intelligence and machine learning to enable modern spectrum sensing and detection signal processing for electronic support and electronic attack Another key contribution is examination of counter DRFM techniques DRFM and transceiver design details and examples are provided along with the MATLAB software allowing the reader to construct their own embedded DRFM transceivers for unmanned systems It examines the design trade offs in developing multiple structured false target synthesis DRFM architectures and aids in developing counter DRFM techniques and distinguish false target from real ones Written by an expert in the field and including MATLAB design software this is the only comprehensive book written on the subject of DRFM Developing Digital Architecture ,2003 *Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications* Maksym Spiriyagin, Stefano Bruni, Colin Cole, 2025-06-17 With contributions from experts from around the world this handbook aims to systemize the existing experience and knowledge that can be used to the development of more efficient and controlled railway systems As a result this handbook showcases the modern methods methodologies and frameworks for the development of DT and AI architectures and apparatus in the area of the existing railway systems and transport engineering tasks The chapters cover such varied and specialized topics as the processes related to the transformation of a physical twin into a digital twin the application of data driven and physics based simulation approaches in the development of digital twins asset management application tasks with the implementation of DT and AI and the experimental and field applications of the

DT and AI concepts and technologies in railway transport system design and predictive maintenance tasks Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications is essential reading for engineers practitioners and researchers involved in the development of railway transport and transit systems *Handbook of Research on Digital Libraries: Design, Development, and Impact* Theng, Yin-Leng, Foo, Schubert, Goh, Dion, Na, Jin-Cheon, 2009-02-28 This book is an in depth collection aimed at developers and scholars of research articles from the expanding field of digital libraries Provided by publisher *Fabricate 2020* Jane Burry, Jenny E. Sabin, Bob Sheil, Marilena Skavara, 2020-04-06 Fabricate 2020 is the fourth title in the FABRICATE series on the theme of digital fabrication and published in conjunction with a triennial conference London April 2020 The book features cutting edge built projects and work in progress from both academia and practice It brings together pioneers in design and making from across the fields of architecture construction engineering manufacturing materials technology and computation Fabricate 2020 includes 32 illustrated articles punctuated by four conversations between world leading experts from design to engineering discussing themes such as drawing to production behavioural composites robotic assembly and digital craft **High Definition**, 2014-03-14 A pioneering title High Definition explores the onslaught of new and highly accurate digital metrology tools in large and small scale 3 D scanning and 3 D modelling Capable of measuring space to an accuracy of less than 1 mm these tools offer unprecedented precision for the development and interrogation of design before during and post production Over the last decade or so the array of designers digital tools to propose and make their ideas have evolved significantly but the absence of high accuracy zero tolerance design production has often remained the missing piece between design and fulfilment Innovative technologies are thus substantially recalibrating the way that designers operate in the world between the drawn and the made having the power to transform the architect's role from that of visualiser to one that is intensely involved with the realisation of objects and buildings High Definition will examine the capabilities of advanced technologies in design production through their impact on design theory practice and greater levels of collaboration between design and manufacturing It will permeate the entangled world between means and meaning and unravel a new understanding between the representation and production of architectural design Contributors include Philip Beesley Centre for Advanced Spatial Analysis Gehry Technologies Ruairi Glynn Zaha Hadid Architects ScanLAB Projects Territorial Agency Skylar Tibbits Mike Webb **Hearings on National Defense Authorization Act for Fiscal Year 1995--S. 2182 (H. Digital Architecture - Results From a Gap Analysis ,2015 The digital architecture is defined as a collection of IT capabilities needed to support and integrate a wide spectrum of real time digital capabilities for nuclear power plant performance improvements The digital architecture can be thought of as an integration of the separate I C and information systems already in place in NPPs brought together for the purpose of creating new levels of automation in NPP work activities In some cases it might be an extension of the current communication systems to provide digital communications where they are currently analog only This collection of IT capabilities must in turn be based on a set of user requirements that must be supported for the interconnected technologies to operate in an integrated manner These requirements simply put are a statement of what sorts of digital work

functions will be exercised in a fully implemented seamless digital environment and how much they will be used The goal of the digital architecture research is to develop a methodology for mapping nuclear power plant operational and support activities into the digital architecture which includes the development of a consensus model for advanced information and control architecture The consensus model should be developed at a level of detail that is useful to the industry In other words not so detailed that it specifies specific protocols and not so vague that it is only provides a high level description of technology The next step towards the model development is to determine the current state of digital architecture at typical NPPs To investigate the current state the researchers conducted a gap analysis to determine to what extent the NPPs can support the future digital technology environment with their existing I C and IT structure and where gaps exist with respect to the full deployment of technology over time The methodology result and conclusions from the gap analysis are described in this report
