# Developing Objectoriented Multimedia Software

**Dimitris N. Chorafas**

## **Developing Objectoriented Multimedia Software:**

**Developing Object-oriented Multimedia Software** Philipp Ackermann,1996 This book on the MET multimedia application framework provides an in depth look at the concepts and techniques applied in an object oriented class library to support multimedia application development It is a reference for software designers and programmers who want to build multimedia applications by reusing components of the MET framework *Designing Effective and Usable Multimedia Systems* Alistair G. Sutcliffe,Peter Johnson,Jürgen Ziegler,1998-09-30 Designing Effective and Usable Multimedia Systems presents research and development and industrial experience of usability engineering for multimedia user interfaces The book discusses the methods tools and guidelines for multimedia use and implementation and covers the following topics in detail Design methods for multimedia MM systems Social and cognitive models for MM interaction Empirical studies of the effects of MM on learning and behavior Design and prototyping support tools Intelligent MM Systems and Design support Usability evaluation LIST Designing Effective and Usable Multimedia Systems contains the proceedings of the International Working Conference on Designing Effective and usable Multimedia Systems sponsored by the International Federation for Information Processing IFIP held in Stuttgart Germany in September 1998 It is essential reading for computer scientists software developers information systems managers and human scientists especially those working in the applied disciplines such as human factors and interface design *PREMO: A Framework for Multimedia Middleware* David J. Duke,Ivan Herman,M. Scott Marshall,2003-05-15 In 1998 SC24 the subcommittee of ISO IEC JTC 1 concerned with computer graphics and image processing completed work on a new standard for multimedia presentation the PREMO standard Presentation Environment for Multimedia Objects is published under the official reference ISO IEC 14478 PREMO essentially provides a middleware specification for multimedia programming more generally it also serves as a reference model for distributed multimedia This book does not attempt to replace the official standard but provides a readable version of the basic concepts presents some features of the PREMO objects in detail highlights the reasons for specific design decisions and gives simple examples and motivation clarifying the underlying concepts A particularly helpful feature is that the authors provide detailed specifications of the PREMO objects in Java Mainly for students and professionals who need to improve their understanding of the issues involved in distributed multimedia **Operation Future** Richard Rizkallah Rabbat,1996 Computer education has grown from the state of concept to reality Multimedia laboratories are burgeoning in different universities and schools that are used to help professors in the curriculum The Internet has grown from an interesting research project to a world wide communication medium Information has become instantaneously available to everybody Computing power has grown exponentially to reach levels only seen in mainframes a couple of decades ago The computer is now a tool used in everyday life available in every home Research in the multimedia field has profited from that spread of computer technology which had an effect on the way knowledge is transmitted Computer education is now a reality but needs further development Allowing

teachers to develop multimedia applications to use in the course curriculum and giving them access to the world of data within their software is an area of active research. This document describes research work I have conducted at the Massachusetts Institute of Technology MIT and the American University of Beirut AUB as part of a joint AUB MIT project. The project involved work on the AthenaMuse 2 multimedia authoring system as well as the use of AthenaMuse 2 to build a multimedia application in that case a language learning application that teaches Spanish Language learning lends itself to the use of the computer because of the communication and the media capabilities of computers. On the other hand using object oriented technology allows computer programmers to build on previous work thus allowing for flexibility and speed in the design and implementation of multimedia software. The work conducted on AthenaMuse 2 is a proof of concept in how the new generation of multimedia authoring systems allows for rapid development of educational software. The contribution to the field of networked object oriented multimedia is presented throughout this present document.

**Journal of Object-oriented Programming**, 2000      **Advanced Multimedia Content Processing** Shojiro Nishio, Fumio Kishino, 1999-03-24 This volume is the Proceedings of the First International Conference on Advanced Multimedia Content Processing AMCP 98. With the remarkable advances made in computer and communication hardware software system technologies we can now easily obtain large volumes of multimedia data through advanced computer networks and store and handle them in our own personal hardware. Sophisticated and integrated multimedia content processing technologies which are essential to building a highly advanced information based society are attracting ever increasing attention in various service areas including broadcasting publishing medical treatment entertainment and communications. The prime concerns of these technologies are how to acquire multimedia content data from the real world how to automatically organize and store these obtained data in databases for sharing and reuse and how to generate and create new attractive multimedia content using the stored data. This conference brings together researchers and practitioners from academia industry and public agencies to present and discuss recent advances in the acquisition management retrieval creation and utilization of large amounts of multimedia content. Artistic and innovative applications through the active use of multimedia content are also subjects of interest. The conference aims at covering the following particular areas: 1 Dynamic multimedia data modeling and intelligent structuring of content based on active bottom up and self organized strategies 2 Access architecture querying facilities and distribution mechanisms for multimedia content.

**Meme Media and Meme Market Architectures** Yuzuru Tanaka, 2003-07-10 This book provides an integrated view of the five kinds of enabling technologies in terms of knowledge media architectures multimedia and hypermedia object oriented GUI and visual programming reusable component software and component integration network publishing and electronic commerce and object oriented and multimedia databases. Among many books on multimedia and hypermedia few address knowledge. Of those that do none focus on media for the editing distribution and management of knowledge the way this book does. It is written based on the hypothesis that

knowledge media work as genes with their network publishing repository working as a gene pool to accelerate the evolution of knowledge shared in our societies
