Pelsler, 2022-07-09 This book approaches environmental climate and social justice comprehensively and interlinked The contributors predominantly from the Global South and have lived experiences challenge the eurocentrism that dominates knowledge production and discourses on environmental and climate in justices The collection of works balances theoretical empirical and practical aspects to address environmental and climate justice challenges through the lens of social justice This book gives voice to scholars of the Global South and uses an interdisciplinary approach to show the complexity of the

problem and the opportunities for solutions making this book a powerful resource in teaching research and advocacy efforts.
