Crisis Economics Nouriel Roubini,Stephen Mihm,2010-05-11 This myth shattering book reveals the methods Nouriel Roubini used to foretell the current crisis before other economists saw it coming and shows how those methods can help us make sense of the present and prepare for the future Renowned economist Nouriel Roubini electrified his profession and the larger financial community by predicting the current crisis well in advance of anyone else Unlike most in his profession who treat economic disasters as freakish once in a lifetime events without clear cause Roubini after decades of careful research around the world realized that they were both probable and predictable Armed with an unconventional blend of historical analysis and global economics Roubini has forced politicians policy makers investors and market watchers to face a long neglected truth financial systems are inherently fragile and prone to collapse Drawing on the parallels from many countries and centuries Nouriel Roubini and Stephen Mihm a professor of economic history and a New York Times Magazine writer show that financial cataclysms are as old and as ubiquitous as capitalism itself The last two decades alone have witnessed comparable crises in countries as diverse as Mexico Thailand Brazil Pakistan and Argentina All of these crises not to mention the more sweeping cataclysms such as the Great Depression have much in common with the current downturn Bringing lessons of earlier episodes to bear on our present predicament Roubini and Mihm show how we can recognize and grapple with the inherent instability of the global financial system understand its pressure points learn from previous episodes of irrational exuberance pinpoint the course of global contagion and plan for our immediate future Perhaps most important the authors considering theories statistics and mathematical models with the skepticism that recent history warrants explain how the world s economy can get out of the mess we re in and stay out In Roubini s shadow economists and investors are increasingly realizing that they can no longer afford to consider crises the black swans of
