Creating Mind John E. Dowling, 1998 What makes us human and unique among all creatures is our brain Consciousness perception emotion memory learning language and intelligence all originate in and depend on the brain Over the past century our understanding of the brain has raced forward to reveal many of the mechanisms by which the brain creates mind and consciousness In this brief introduction to the brain neuroscientist John Dowling conveys to the general reader the essence and vitality of the field of neuroscience the progress we are making in understanding how brains work and some of our strategies for studying brain function Dowling often relates the exciting discoveries of neuroscience to specific examples of brain phenomena such as disease mental illness aging or brain injury demonstrating how these alterations in brain function cast light on normalcy and describing some of the therapies enabled by our understanding of the brain

The Power of Story Joan Wink Ph.D., 2017-11-07 Through this book readers will discover that stories can move the human heart and head in ways that research cannot Stories bring together readers writers librarians teachers students and families in the libraries of today and will continue to do so tomorrow Written for all those lovers of literacy this book links libraries and literacies through the power of stories The book is not filled with data in the form of pie charts graphs and tables Rather the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries The author's primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all The book begins by presenting anecdotes and the author's personal story to lay the foundation for what literacies are and what literacy is not An activity Spiral of Literacy allows readers to reflect on their own literacies Chapters that follow each begin with a story that sets the theoretical foundation Each chapter concludes with an action section that demonstrates how to turn theory to practice whether you are in a library a classroom or at home A final chapter envisions what libraries might look like in 10 years through interviews with librarians teachers and others interested in literacy

Beyond Oneness and Difference Brook Ziporyn, 2013-10-29 Beyond Oneness and Difference considers the development of one of the key concepts of Chinese intellectual history Li A grasp of the strange history of this term and its

seemingly conflicting implications as oneness and differentiation as the knowable and as what transcends knowledge as the good and as the transcendence of good and bad as order and as omnipresence raises questions about the most basic building blocks of our thinking This exploration began in the book s companion volume *Ironies of Oneness and Difference* which detailed how formative Confucian and Daoist thinkers approached and demarcated concepts of coherence order and value identifying both ironic and non ironic trends in the elaboration of these core ideas In the present volume Brook Ziporyn goes on to examine the implications of Li as they develop in Neo Daoist metaphysics and in Chinese Buddhism ultimately becoming foundational to Song and Ming dynasty Neo Confucianism the orthodox ideology of late imperial China Ziporyn s interrogation goes beyond analysis to reveal the unsuspected range of human thinking on these most fundamental categories of ontology metaphysics epistemology and ethics
