Quester, 2019-10-28 In this study first published in 1966 Quester analyzes pre nuclear age theories of deterrence to equip us with perspective and data by which current theories can be evaluated Quester presents a forceful argument in support of the relevance of history to discussions of military strategy

Deterrence Before Hiroshima. The Airpower Background of Modern Strategy George Herman QUESTER, 1966

Deterrence before Hiroshima : the airpower background of modern strategy George H. Quester, **Nuclear Weapons and Cooperative Security in the 21st Century** Stephen J. Cimbala, 2009-09-10 This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen J Cimbala is Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors

Rethinking Cyber Warfare R. David Edelman, 2024 Rethinking Cyber Warfare provides a fresh understanding of the role that digital disruption plays in contemporary international security and proposes a new approach to more effectively restrain and manage cyberattacks

Defence and Consensus Christoph Bertram, 1983-06-18

Nuclear Weapons and Strategy Stephen J. Cimbala, 2006-03-10 Nuclear weapons once thought to have been marginalized by the end of the Cold War have returned with a vengeance to the centre of US security concerns and to a world bereft of the old certainties of deterrence This is a major analysis of these new strategic realities The George W Bush administration having deposed the

regime of Saddam Hussein in Iraq now points to a new nuclear Axis of Evil Iran and North Korea These nations and other rogue states as well as terrorists may pose key threats because they are beyond deterrence which was based on the credible fear of retaliation after attack This new study places these and other developments such as the clear potential for a new nuclear arms race in Asia within the context of evolving US security policy Detailing the important milestones in the development of US nuclear strategy and considering the present and future security dilemmas related to nuclear weapons this is a major new contribution to our understanding of the present international climate and the future Individual chapters are devoted to the key issues of missile defenses nuclear proliferation and Israel s nuclear deterrent This book will be of great interest to all students and scholars of strategic studies international relations and US foreign policy

The Bomb Beatrice Heuser,2014-09-25 This tightly argued and profoundly thought provoking book tackles a huge subject the coming of the nuclear age with bombing of Hiroshima and Nagasaki in August 1945 and the ways in which it has changed our lives since Dr Heuser sets these events in their historical context and tackles key issues about the effect of nuclear weapons on modern attitudes to conflict and on the ethics of warfare Ducking nothing she demystifies the subject seeing the bomb not as something unique and paralysing but as an integral part of the strategic and moral context of our time For a wide multidisciplinary and general readership

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner,1991 Steiner analyzes how and why Brodie s understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie s work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

Counsels of War Gregg Herken,2015-02-18 Since the first atomic bomb was exploded in 1945 a close community of civilian experts including scientists academics and think tank intellectuals has advised the American government on the prospects of nuclear war Based on interviews with these experts as well as hundreds of pages of recently declassified documents Counsels of War is the first book to trace in detail the deliberations and shifting recommendations of the experts on the bomb from Hiroshima to Star Wars Gregg Herken writes about the people whose profession it has been to think about the unthinkable Robert McNamara Paul Nitze Herman Kahn Bernard Brodie including their intense rivalries personal animosities and often contentious relationship with the professional military He reveals how the influence of the scientist and strategist has extended well beyond the laboratory and the classroom in the proposal of Kennedy s advisers for a nuclear demonstration and even a clever first strike against the Russians for example Counsels of War also shatters certain popular assumptions about U S nuclear policy As Herken points out while American doctrine stresses retaliation U S strategists have always planned to pre empt a Soviet attack Herken shows that the lines in the current nuclear debate were actually drawn at the dawn of the atomic age and that the experts technically abstruse arguments have only served to hide from the public the fundamental deeply held and quite subjective

differences at the heart of the debate Since Hiroshima there has been a growing awareness of the peril created by nuclear weapons yet the crucial questions that were never adequately addressed in 1945 unanswered today Given the inability of the experts to confront the essential dilemma of the nuclear age Counsels of War calls for a new nuclear debate one focused on American rather than Soviet intentions and that seeks an answer to the fundamental yet still unresolved question What are these weapons for
