**Stephen Macekura**

## **Development Globalisation And Sustainability:**

Development, Globalisation and Sustainability John Morgan, 2001 One of five new additions to the EPICS range published in 2001 dealing with more popular topics for the new specifications EPICS brings a fresh approach to topics of current interest allowing students to acquire an up to date and in depth understanding of geographical issues Each topic provides a wide range of detailed case studies and offers an intergrated approach to all aspects of geographical study

**Globalization and Sustainable Development** Martin Oyevaar, Diego Vazquez-Brust, Harrie W.M. Van Bommel, 2017-09-16 This important core textbook explores the complex and dynamic nature of globalization and sustainability analyzing the main ideas ethical principles and processes driving the growth and development of the global economy Including a wide range of international cases from a variety of industries it anchors key concepts in a modern global context and provides an overall picture of what it means to be a sustainable business Bridging international business business ethics and sustainable development the text enables students to place core concepts into a modern global context and provides an extensive and engaging pedagogical framework that carries the student from a foundation level through to a more advanced analysis This is an ideal textbook for undergraduate and postgraduate students taking modules in

international business sustainable development the global economy or globalisation **Globalisation and Sustainable Development in Latin America** Suranjit Kumar Saha, David Parker, 2002 The core objective of this book is to illustrate how the forces of globalisation impact upon the prospects for sustainable development using Latin America one of the major emerging regions of the world as a case study The book seeks to bring together the two hitherto separate paradigms of globalisation and sustainable development into one analytical framework This the authors hope will increase support for furthering sustainable development in developing countries in the context of globalisation Globalisation and Sustainable Development in Latin America includes contributions written by established and respected Latin American authors translated into English for the first time

**Globalization, Environmental Law, and Sustainable Development in the Global South (Entire Book in Open Access).** Paolo Davide Farah, Kirk W. Junker, 2023 Globalization is a word with many meanings Some people say globalization is responsible for having lifted millions of people out of poverty over the past decades Other people say that globalization is neocolonialism All will agree that the processes that accompany globalization have had tremendous impacts on the environment Commodification of the environment along with environmental degradation have led to an almost universal awareness of the negative effects of such crises as disrupted climate The conservation and restoration of the environment as well as the protection of biodiversity are essential for human life including its economic components The international community has responded to the challenge by shifting away from the Brundtland Commission's intergenerational concept of development which meets the needs of current generations without compromising the ability of future generations to meet their own needs to equating development with economic development

under the New York Convention and reserving a third and separate pillar for economics over and against social concern and the environment However promising the concepts sustainable development and sustainability may have been they have become overused and meaningless Like worn out coins they became just placeholders To re inscribe meaning in the metal of sustainable development the authors in this book examine environmental problems caused facilitated or exacerbated by globalization as seen from the perspectives of the Global South and emerging economies Investments trade and technological advances are key driving forces of transition in these countries The economic development component also known as green growth policies may be preferred by globalizing forces which also regard it as most suitable to cope with climate disruption for example With the globalization of economics comes some aspects of the globalization of law The globalization of environmental law that is currently under formation in the Global South addresses the integration of the ecological and economic components by analyzing the contribution of emerging and developing economies Sometimes environmental law is part of the solutions sometimes environmental law is part of the problems In this book the terms Global South and emerging economies are included as alternative conceptualizations to the developed and developing countries But this alternative conceptualization itself is a divide that enables globalization In the chapters of this book the perspectives of the Global South and emerging economies are presented by lawyers from Brazil Ethiopia India Mongolia Nigeria and St Vincent and the Grenadines as well as from the European states of France Georgia Germany and Slovakia The authors are natives of either emerging economies or of the Global South or work extensively in those regions All of the book s themes are mentioned in the title globalization environmental law sustainable development the Global South implementation and challenges

**Technology, Globalization, and Sustainable Development** Nicholas A Ashford,Ralph P Hall,2018-08-06 Technology Globalization and Sustainable Development offers a unified transdisciplinary approach for transforming the industrial state in order to promote sustainable development The authors present a deep analysis of the ways that industrial states both developed and developing are currently unsustainable and how economic and social welfare are related to the environment to public health and safety and to earning capacity and meaningful and rewarding employment The authors offer multipurpose solutions to the sustainability challenge that integrate industrial development employment technology environment national and international law trade finance and public and worker health and safety The authors present a compelling wake up call that warns of the collision course set between the current paths of continued growth and inevitable unsustainability in the world today Offering clear examples and real solutions this textbook illustrates how the driving forces that are currently promoting unsustainability can be refocused and redesigned to reverse course and improve the state of the world This book is essential reading for those teaching and studying sustainable development and the critical roles of the economy employment and the environment

**Globalization and Sustainable Economic Development** Piya Mahtaney,2013-07-31 In a world in transition and an era of transformation Mahtaney calls for reflection and an analysis of a

wide canvas of global economic experience Her new work initiates a thorough review of the strategies and policies that have been pursued over the past two decades The economic meltdown compelled the beginning of the next phase of globalization and she contends that the future will see an increase in globalization As crucial questions arise about the direction in which globalization is headed and the sustainability of economic growth and reform the fundamental objective of this exciting work is to elucidate crucial insights about the next phase of development in the world economy

**Environment and Sustainability in a Globalizing World** Andrea J. Nightingale, 2019-03-27 From the Foundations in Global Studies series this student friendly text follows a two pronged approach to help readers understand the globalizing processes relating to environment and sustainability which are examined in a range of disciplines including environmental studies geography global studies political science international affairs comparative politics and other disciplines First it presents foundational material that gives students the conceptual underpinnings required for rigorous analysis Following the Introduction and Overview Part One presents a brief historical overview of the concerns revolving around environmental sustainability in the modern era The text then covers key concepts and theoretical constructs that define the global context for sustainable environmental practices such as the key thinkers and theories pertaining to sustainable environmental practice and the key international agencies and treaties involved in global discussions The first part then explores the various models and ways to measure sustainability the range of environmental domains at play in the sustainability dialogue and the controversies surrounding them Part Two employs case studies to examine theory and practice at work in particular situations The case studies have been selected with an eye toward comprehensiveness of coverage across disciplines and across regions

**Tourism and Sustainability** Martin Mowforth, Ian Munt, 2015-12-22 By January 2015 the world's richest 80 people had as much wealth as the poorest 50 per cent of the world's population It is a global unevenness through which the barriers to migration of Third World migrants to wealthy First World nations go ever higher while the barriers to travel in the reverse direction are all but extinct So how exactly does tourism contribute to narrowing this glaring inequality between the rich and poor Are ever expanding tourism markets a smoke free socioculturally sensitive form of human industrialisation Is alternative tourism really a credible lever for reducing global inequality and eliminating poverty Tourism and Sustainability critically explores the most significant universal geopolitical norms of the last half century development globalisation and sustainability and through the lens of new forms of tourism demonstrates how we can better get to grips with the rapidly changing new global order The fourth edition has been extensively revised and updated and benefits from the addition of new material on climate change and tourism Drawing on a range of examples from across the Third World Mowforth and Munt expertly illustrate the social economic and environmental conditions that continue to affect the tourism industry With the first edition hailed by Geoffrey Wall as one of the most significant books produced on tourism since the turn of the millennium Tourism and Sustainability remains the essential resource for students of human geography environmental

sciences and studies politics development studies anthropology and business studies as well as tourism itself Of Limits and Growth Stephen Macekura,2015-07-15 Of Limits and Growth connects three of the most important aspects of the twentieth century decolonization the rise of environmentalism and the United States support for economic development and modernization in the Third World It links these trends by revealing how environmental NGOs challenged and reformed the development approaches of the US government World Bank and United Nations from the 1960s through the 1990s The book shows how NGOs promoted the use of appropriate technologies environmental reviews in the lending process development plans based on ecological principles and international cooperation on global issues such as climate change It also reveals that the sustainable development concept emerged from transnational negotiations in which environmentalists accommodated the developmental aspirations of Third World intellectuals and leaders In sum Of Limits and Growth offers a new history of sustainability by elucidating the global origins of environmental activism the ways in which environmental activists challenged development approaches worldwide and how environmental non state actors reshaped the United States and World Bank s development policies *Globalisation and Sustainable Development in Latin America* Suranjit Kumar Saha,David Parker,2002 The core objective of this book is to illustrate how the forces of globalisation impact upon the prospects for sustainable development using Latin America one of the major emerging regions of the world as a case study The book seeks to bring together the two hitherto separate paradigms of globalisation and sustainable development into one analytical framework This the authors hope will increase support for furthering sustainable development in developing countries in the context of globalisation *Globalisation and Sustainable Development in Latin America* includes contributions written by established and respected Latin American authors translated into English for the first time **The Dilemma of Sustainability in the Age of Globalization** Mohamed El-Kamel Bakari,2017-09-05 **The Dilemma of Sustainability in the Age of Globalization** A Quest for a Paradigm of Development offers an exhaustive overview of the different political social economic and cultural circumstances that paved the way for the inception of sustainable development It particularly traces the evolution of this project in an unpropitious context of neo liberal capitalism and globalization By means of an in depth critical comparative analysis of the two phenomena of sustainable development and globalization this book highlights aspects of both their divergence and convergence on issues such as development man nature relationship and society This distinctive approach pinpoints the theoretical and factual aspects of clash and affinity between globalization and sustainability and spotlights some potential harmonization between the two on different levels On the whole this book covers a few gaps in the contemporary literature that heightened the need for analysis of the viability of implementing the project of sustainable development in a context of neoliberal capitalism Given the highly interdisciplinary nature of its topic a holistic approach is utilized throughout this book integrating historical literary economic political and scientific material The first part of this book is largely based on a critical comparative analysis of the two vying paradigms of development by means of a thorough

juxtaposition of their theoretical and ideological underpinnings and backed up by lucid examples statistics and case studies In later sections this book provides an analysis and discussion of both the extrinsic and intrinsic obstacles to promoting sustainability in the current socio economic paradigm of development and closes by offering glimpses of hope for the future of humankind by underlining the potential of new initiatives to revive sustainable development in the 21st century

**Europe, Globalization and Sustainable Development** John Barry, Brian Baxter, Richard Dunphy, 2004-03-01 This edited volume considers the ways in which European states and the European Union can and should organize themselves economically and socially in order to address the challenges of sustainable development It will interest students and researchers of environmental policy and European politics Kondratieff waves Brian J. L. Berry, Leonid E. Grinin, Andrey V. Korotayev, Philippe Jourdon, Lucas Bernard, Aleksandr V. Gevorkyan, Tom Palley, Willi Semmler, William R. Thompson, Arno Tausch, Denis J. Dean, Euel Elliott, Jonas Van Vossle, Peter Herrmann, Stephen I. Ternyik, Leo Nefiodow, Simone Nefiodow, Anton L. Grinin, Valentina M. Bondarenko, Nikolai D. Kondratieff, Barry K. Gills, Robert A. Denemark, 2015-05-29 In the period from the 1920s to 1930s the theory of economic cycles underwent dramatic changes Due to the research of such famous economists as Nikolay Kondratieff Joseph Kitchin Wesley Mitchell Simon Kuznets and Joseph Schumpeter the idea of a whole system of economic cycles with characteristic periods between two and sixty years was developed The idea of a system of intertwined economic cycles is nowadays paramount to the school of evolutionary economics and its development promises rather interesting future outcomes That is why this issue of our Kondratieff Waves Yearbook is devoted to the interconnections between various economic cycles As to the subtitle of this volume one should note that many of the contributors refer to the system of cycles and the fact that real economic cycles make up a system whereas among different types of cycles the Juglar Kuznets and Kondratieff cycles are the most important ones for the present day economic dynamics Although Kondratieff himself considered long waves as above all an economic phenomenon the theory of the long waves became however very actively developed in connection with their political and geopolitical aspects In this Yearbook the political aspect of Kondratieff waves is the subject of several articles in the second section The last section of this Yearbook is devoted to the heritage of Kondratieff and other prominent economists The year 2015 marks the 150th anniversary of the outstanding Russian economist one of the most prominent researchers of medium term economic cycles Mikhail Tugan Baranovsky and the volume is concluded with Kondratieff's article about him Concerning 2015 we should mention another anniversary namely 30 years since the death of Simon Kuznets 1901 1985 This edition will be useful for economists social scientists as well as for a wide range of those interested in the problems of the past present and future of global economy and globalization **Globalization, Environmental Law, and Sustainable Development in the Global South** Kirk W. Junker, Paolo Davide Farah, 2021-11-29 This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South Comprising contributions from lawyers from the

Global South or who have experience in the Global South this volume is organized into three parts with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained given the limited carrying capacity of the earth Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization Some of those problems include redistribution of environmental burden on the public through over reliance on the state in emerging economies and the transition to public private partnerships as well as extreme uncontrolled economic expansion Building on Part I Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law Recognizing the impossibility of a globalized Northern economy the authors in Part III present some alternatives through framework ideas of human and civil rights environmental rights and indigenous persons rights as well as concrete and specific legal tools to strengthen justice and rule of law institutions The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers and can thereby form the basis for changes in practices as well as further discussions and comparisons This book will be of great interest to students and scholars of environmental law sustainable development and globalization and international relations as well as legal professionals and practitioners

*Tourism and Sustainability* Martin Mowforth, Ian Munt, 2003-12-08 *Tourism and Sustainability* explores and challenges the notions of development sustainability globalisation and power and their relationship to contemporary tourism in the third world

**Globalisation, Economic Transition and the Environment** Philip Lawn, 2013 This book focuses on three critical issues pertaining to the broader goal of sustainable development namely the degenerative forces of globalization ecological sustainability requirements and how best to negotiate the economic transition process While the applicability of ecological sustainability to sustainable development is obvious the association between economic transition and sustainable development and more particularly how globalization forces can impact negatively on the sustainable development process is poorly understood Philip Lawn brings together some of the leading practitioners in the field of sustainable development to discuss these issues and to outline ways to achieve sustainable development without the perceived need for continuous growth The book culminates with a number of policy recommendations and institutional modifications to assist nations and the global community to achieve sustainable development This book will prove invaluable for academics and researchers in ecological environmental and natural resource economics as well as sustainable development globalization and international trade Practitioners and policy makers at all levels will find this resource both interesting and instrumental to their work Contributors M Borucke M Clarke M Cole R Costanza H Daly P Fredriksson A Galli T Jackson I Kubiszewski P Lawn E Lazarus S Mattoon W Rees J Rockström W Steffen P Victor M Wackernagel

**Palgrave Advances in International Environmental Politics** M. Betsill, K. Hochstetler, D. Stevis, 2005-10-31 *Palgrave Advances in International Environmental Politics* provides a state of the art review of the major

theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical questions that emerge from the review

**Critical analysis of ecologically sustainable development** Stefan Krauss,2005-01-19 Essay from the year 2004 in the subject Environmental Sciences grade HD Murdoch University ISTP Institute for Sustainability and Technology Policy course Ecologically sustainable development language English abstract QUESTION I I Based on the various readings and websites what if any seem to be the core agreed principles of sustainable development and what are the key areas that are contested Regretfully the umbrella term sustainable development is increasingly being used indiscriminately and arbitrarily in both the scientific and the political discussion of sustainable development The concept thus encourages increasingly arbitrary definitions For logical reasons any concept which has to encompass almost everything extension must lose specific meaning intension However after more than twenty years of debate about the term one can identify an ethical profound core meaning as well as some clear contoured basic conceptions of sustainability<sup>1</sup> The debate about sustainability refers on a high grade of abstraction to a way of life and economic manners that are capable for the future and which are grounded in moral obligations towards future generations and their life prospects Thus the orientation at intergenerational equity is constitutive for Sustainability In each conception of Sustainability there has to be answered the question which kinds of inheritance belong to a intergenerational legacy To the pure moral perspective that deals with the question if there are obligations towards future generations at all e g Partridge 1990 Howarth 1992 there must in concreto be added power of judgement and reasoning that say something about kind extend and contend of the legacy Here one moves in a scope discretion
