Curve Surface Fitting An Introduction:

Curve and Surface Fitting Peter Lancaster, Kęstutis Šalkauskas, 1986 The purpose of this book is to reveal the foundations and major features of several basic methods for curve and surface fitting that are currently in use Curve and Surface Fitting Peter Lancaster, 1986 Curve and Surface Fitting with Splines Paul Dierckx, 1995 Describes the algorithms and mathematical fundamentals of a widely used FORTRAN package for curve and surface fitting with splines Artificial Intelligence and Computational Intelligence Jingsheng Lei, Fu Lee Wang, Hepu Deng, Duoqian Miao, 2012-09-28 This volume proceedings contains revised selected papers from the 4th International Conference on Artificial Intelligence and Computational Intelligence AICI 2012 held in Chengdu China in October 2012 The total of 163 high quality papers presented were carefully reviewed and selected from 724 submissions The papers are organized into topical sections on applications of artificial intelligence applications of computational intelligence data mining and knowledge discovery evolution strategy expert and decision support systems fuzzy computation information security intelligent control intelligent image processing intelligent information fusion intelligent signal processing machine learning neural computation neural networks particle swarm optimization and pattern recognition **Advances in Geometric Modeling and Processing** Falai Chen, Bert Jüttler, 2008-04-30 Geometric Modeling and Processing GMP is a biennial international conference on geometric modeling simulation and computing which provides researchers and practitioners with a forum for exchanging new ideas discussing new applications and presenting new solutions Previous GMP conferences were held in Pittsburgh 2006 Beijing 2004 Tokyo 2002 and Hong Kong 2000 This the 5th GMP conference was held in Hangzhou one of the most beautiful cities in China GMP 2008 received 113 paper submissions covering a wide spectrum of geometric modeling and processing such as curves and surfaces digital geometry processing geometric feature modeling and recognition geometric constraint solving geometric optimization multiresolution modeling and applications in computer vision image processing scientific visualization robotics and reverse engineering Each paper was reviewed by at least three members of the program committee and external reviewers Based on the recommendations of the reviewers 34 regular papers were selected for oral presentation and 17 short papers were selected for poster presentation All selected papers are included in these proceedings We thank all authors external reviewers and program committee members for their great effort and contributions which made this conference a success Curves and Surfaces Jean-Daniel Boissonnat, Patrick Chenin, Albert Cohen, Christian Gout, Tom Lyche, Marie-Laurence Masure, Larry Schumaker, 2012-01-07 This volume constitutes the thoroughly refereed post conference proceedings of the 7th International Conference on Curves and Surfaces held in Avignon in June 2010 The conference had the overall theme Representation and Approximation of Curves and Surfaces and Applications The 39 revised full papers presented together with 9 invited talks were carefully reviewed and selected from 114 talks presented at the conference The topics addressed by the papers range from mathematical foundations to practical implementation on modern graphics

processing units and address a wide area of topics such as computer aided geometric design computer graphics and visualisation computational geometry and topology geometry processing image and signal processing interpolation and smoothing scattered data processing and learning theory and subdivision wavelets and multi resolution methods

The NURBS Book Les Piegl, Wayne Tiller, 2012-12-06 Until recently B spline curves and surfaces NURBS were principally of interest to the computer aided design community where they have become the standard for curve and surface description Today we are seeing expanded use of NURBS in modeling objects for the visual arts including the film and entertainment industries art and sculpture NURBS are now also being used for modeling scenes for virtual reality applications These applications are expected to increase Consequently it is quite appropriate for The NURBS Book to be part of the Monographs in Visual Communication Series B spline curves and surfaces have been an enduring element throughout my professional life The first edition of Mathematical Elements for Computer Graphics published in 1972 was the first computer aided design interactive computer graphics textbook to contain material on B splines That material was obtained through the good graces of Bill Gordon and Louie Knapp while they were at Syracuse University A paper of mine presented during the Summer of 1977 at a Society of Naval Architects and Marine Engineers meeting on computer aided ship surface design was arguably the first to examine the use of B spline curves for ship design For many B splines rational B splines and NURBS have been a bit mysterious

Bayesian Methods for Nonlinear Classification and Regression David G. T. Denison, Christopher C. Holmes, Bani K. Mallick, Adrian F. M. Smith, 2002-05-06 Nonlinear Bayesian modelling is a relatively new field but one that has seen a recent explosion of interest Nonlinear models offer more flexibility than those with linear assumptions and their implementation has now become much easier due to increases in computational power Bayesian methods allow for the incorporation of prior information allowing the user to make coherent inference Bayesian Methods for Nonlinear Classification and Regression is the first book to bring together in a consistent statistical framework the ideas of nonlinear modelling and Bayesian methods Focuses on the problems of classification and regression using flexible data driven approaches Demonstrates how Bayesian ideas can be used to improve existing statistical methods Includes coverage of Bayesian additive models decision trees nearest neighbour wavelets regression splines and neural networks Emphasis is placed on sound implementation of nonlinear models Discusses medical spatial and economic applications Includes problems at the end of most of the chapters Supported by a web site featuring implementation code and data sets Primarily of interest to researchers of nonlinear statistical modelling the book will also be suitable for graduate students of statistics The book will benefit researchers involved in regression and classification modelling from electrical engineering economics machine learning and computer science
