

Software Development Life Cycle Big Bang Model

This slide depicts the big bang model of the software development life cycle, including its needed inputs such as time, efforts, and resources.

Developers don't follow a set of guidelines

Development starts with required finances and efforts in the form of inputs

Output may or may not meet the customer's needs because, under this paradigm, even the customer's needs aren't specified

Best suited for short tasks such as academic or practical work

Can be developed by one or two developers working together
