**Political Elites in South-West England, 1450-1500** R. E. Stansfield-Cudworth, 2009-07-01 Examining the crown's approach to government in South West England this study investigates Edward IV's policy towards the English regions and explores the feasibility of a regional approach to the politics government and ruling elites of Cornwall Devon Somerset and Dorset Examining Edward IV's regional policy its implications for governance and methodology and questioning its reflection of geographical economic cultural and political regional identities this survey evaluates the political elites peerage and administrative elites in terms of the regionality of their interests such as lands offices and marriages with the regionality of their interactions necessitating consideration of lordship and patron client relationships examined by means of three family case studies The significance of regional governors royal household retainers and the Duchy of Cornwall are highlighted throughout chronological analyses of local government and political alignments though ultimately regional hegemonies may have failed because of their inherent instability and the strength of pre-existing county and meso regional identities Emphasising regional differences and peripheries this synthesis and overview of shire societies affords a greater appreciation of regions identities patronage and royal authority within the broader context of longer term trends in governance institutional evolution and state formation during the later Middle Ages

**Making Domesday** Stephen Baxter, Julia Crick, C. P. Lewis, 2025-04-12 Making Domesday presents a fresh interpretation of William the Conqueror's survey of England made possible by a major collaborative study and a new online edition of Exon Domesday the earliest of the three original manuscripts to survive from the Domesday survey The book addresses big questions about pre-modern government written records and the use of intelligence in both senses the minds behind the planning and execution of Domesday and the information about England that Domesday gathered It characterizes Exon as the surviving part of the working papers of one of the writing offices that over a period of ten weeks in summer 1086 dealt with all seven circuits regional groupings of shires of the Domesday survey The circuit offices had the task of recasting the manorial descriptions assembled in an earlier stage of the survey into an interim form intended for further redaction as Great Domesday Book by rearrangement rewording and abbreviation A new deep understanding of the codicology and palaeography of Exon underpins every part of the analysis and offers a model of documentary production for royal government at an exceptionally early period in western Europe Part I describes and analyses each Exon text in unprecedented detail Part II places Domesday in context and in broad comparative perspective ranging across and beyond the Latin West The dual approach provides a new interpretation of Domesday and a deeper understanding of both the Domesday survey and Domesday Book It emerges that the survey was even more complex than we had dared to imagine involving the production of different kinds of text intended to meet a range of fiscal and political needs It is also clear that the survey was immediately effective transforming the politics of land in a newly conquered society Domesday has always been thought awesome as its very name shows Making Domesday contends that it

was also a feat of intelligent government deployed by an aggressive and ambitious regime As such it speaks to broader concerns with the colonial domination of conquered societies through the purposeful collection of systematic statistical information

The Southwest of England Martyn Francis Wakelin,1986-01-01 The volume consists of a substantial introduction providing a geographical and historical outline of the area an account of the origin of the area an account of the origin of present day southwestern speech varieties and a synopsis of their main features This is followed by texts of three main types brief selections from 17th to 19th century dialect writers aimed at depicting characteristics of southwestern speech longer 20th century texts verse dialogue in novels transcripts from tapes from 1950 onwards of speakers of different ages and social backgrounds A part of each transcript is also provided in phonetic notation
