However it is generally accepted that it is difficult to apply cognitive scientific models to medical training and practice This
book is based on a NATO Advanced Research Workshop held in Italy in 1991 the purpose of which was to examine the impact
of models of cognition on medical training and practice and to outline future research programmes relating cognition and
education and in particular to consider the potential impact of cognitive science on medical training and practice A major
discovery presented in the book is that the research areas related to artificial intelligence cognitive psychology and medical
