Hatcher, 2008 These proceedings contain the full length papers and abstracts of papers presented at the symposium Subjects covered include ecology and modelling in biological control of weeds benefits risks and cost analysis of biological weed control target and biological control agent selection pre release specificity and efficacy testing regulations and public awareness evolutionary processes opportunities and constraints for the biological control of weeds in Europe release activities and post release evaluations and management specifics integration restoration and implementation

Field Guide for the Biological Control of Weeds in the Northwest Rachel Winston, Carol Bell Randall, 2017-12-13 This guide focuses on the most problematic weeds in eastern North America for which there are at least some biocontrol agents established and or available Multiple photos and descriptions of each weed included in this guide emphasize key identification traits and plant ecology For each weed included in this guide all biocontrol agents released or currently found in North America are described individually Photos highlighting key identification features and damage are included The release history current status and recommended use of each biocontrol agent are described in detail Recommendations and current impact often vary between the US and Canada therefore the information is presented separately Includes international code of best practices for classical biological control of weeds

Restoring the Pacific Northwest Dean Apostol, Marcia Sinclair, 2012-09-26 The Pacific Northwest is a global ecological hotspot because of its relatively healthy native ecosystems a high degree of biodiversity and the number and scope of restoration initiatives that have been undertaken there Restoring the Pacific Northwest gathers and presents the best examples of state of the art

restoration techniques and projects It is an encyclopedic overview that will be an invaluable reference not just for restorationists and students working in the Pacific Northwest but for practitioners across North America and around the world

Biological Control Peter G. Mason, 2021-10 Biological Control Global Impacts Challenges and Future Directions of Pest Management provides a historical summary of organisms and main strategies used in biological control as well as the key challenges confronting biological control in the 21st century Biological control has been implemented for millennia initially practised by growers moving beneficial species from one local area to another Today biological control has evolved into a formal science that provides ecosystem services to protect the environment and the resources used by humanity With contributions from dedicated scientists and practitioners from around the world this comprehensive book highlights important successes failures and challenges in biological control efforts It advocates that biological control must be viewed as a global endeavour and provides suggestions to move practices forward in a changing world Biological Control is an invaluable resource for conservation specialists pest management practitioners and those who research invasive species as well as students studying pest management science
