The Challenge of Biotechnology Jagadish Manrakhan, 1990. *Challenges and Strategies for the Development and Commercialisation of Disruptive Biotechnology Innovations* Chris Trent, 2013. Innovation is the bread and butter of company growth. However, the meaning of innovation is blurred. Innovation contains a glut of concepts that are not well understood. Disruptive innovation is one of these concepts that is important to the impact of innovations. The impact of a highly disruptive innovation may potentially create larger growth for a company, therefore a potential level of disruption is pursued. These companies are faced with challenges that can be different to their normal processes and therefore require specific strategies for development and commercialisation of their innovation. The concept of disruptive innovation has not been extensively studied in a biotechnology context. Therefore, the study seeks to explore SME biotechnology company's understanding of innovation. The challenges that the companies have faced in the development and commercialisation and the strategies employed. As to how potentially disruptive an innovation may be, has not been covered extensively and this study attempts to

determine the potential level of disruption To conduct this study an exploratory approach was taken applied to a single case The main findings from the study revealed that the common challenges encountered by small biotechnology companies include the science behind their innovation lack of money to finance the innovation behaviour changes from users of the innovation and the distance from large global markets is challenging for small New Zealand companies The study indicates that the strategies employed from the small biotechnology companies were collaboration in both development and commercialisation employing specialised commercialisation personnel and determining the focus of the company to decrease the risk they face The findings also reveal that for the potential level of disruption KODE Biotech is identified as having a potentially major level of disruption
