Discrete And System Models Modules In Applied Mathematics:

Discrete and System Models Robert McDowell Thrall, William F. Lucas, Fred S. Roberts, 1976 **Modules in Applied Mathematics: Discrete and system models** William F. Lucas, 1983 *Discrete and System Models* W.F. Lucas, F.S. Roberts, R.M. Thrall, 2013-12-19 The purpose of this four volume series is to make available for college teachers and students samples of important and realistic applications of mathematics which can be covered in undergraduate programs The goal is to provide illustrations of how modern mathematics is actually employed to solve relevant contemporary problems Although these independent chapters were prepared primarily for teachers in the general mathematical sciences they should prove valuable to students teachers and research scientists in many of the fields of application as well Prerequisites for each chapter and suggestions for the teacher are provided Several of these chapters have been tested in a variety of classroom settings and all have undergone extensive peer review and revision Illustrations and exercises be covered in one class are included in most chapters Some units can whereas others provide sufficient material for a few weeks of class time Volume 1 contains 23 chapters and deals with differential equations and in the last four chapters problems leading to partial differential equations Applications are taken from medicine biology traffic systems and several other fields The 14 chapters in Volume 2 are devoted mostly to problems arising in political science but they also address questions appearing in sociology and ecology Topics covered include voting systems weighted voting proportional representation coalitional values and committees The 14 chapters in Volume 3 emphasize discrete mathematical methods such as those which arise in graph theory combinatorics and networks *Mathematical Modeling and Optimization* Tony Hürlimann, 2013-03-14 Computer based mathematical modeling the technique of representing and managing models in machine readable form is still in its infancy despite the many powerful mathematical software packages already available which can solve astonishingly complex and large models On the one hand using mathematical and logical notation we can formulate models which cannot be solved by any computer in reasonable time or which cannot even be solved by any method On the other hand we can solve certain classes of much larger models than we can practically handle and manipulate without heavy programming This is especially true in operations research where it is common to solve models with many thousands of variables Even today there are no general modeling tools that accompany the whole modeling process from start to finish that is to say from model creation to report writing This book proposes a framework for computer based modeling More precisely it puts forward a modeling language as a kernel representation for mathematical models It presents a general specification for modeling tools The book does not expose any solution methods or algorithms which may be useful in solving models neither is it a treatise on how to build them No help is intended here for the modeler by giving practical modeling exercises although several models will be presented in order to illustrate the framework Nevertheless a short introduction to the modeling process is given in order to expound the necessary background for the proposed modeling framework **Mathematical Modelling** Murray S.

Klamkin,1987-01-01 Designed for classroom use this book contains short self contained mathematical models of problems in the physical mathematical and biological sciences first published in the Classroom Notes section of the SIAM Review from 1975 1985 The problems provide an ideal way to make complex subject matter more accessible to the student through the use of concrete applications Each section has extensive supplementary references provided by the editor from his years of experience with mathematical modelling *Publicationes mathematicae* Kossuth Lajos Tudományegyetem.
