*Guide to United States Customs and Trade Laws After the Customs Modernization Act* Leslie Alan Glick, 2008-01-01 With the intensified focus on antiterrorism in US trade policy and the transfer of the Customs Service from the US Treasury Department to the Department of Homeland Security as the Bureau of Customs and Border Protection traditional ways of thinking about customs and trade law are now out of date In light of the war on terrorism and the emphasis on border security businesses engaged in the cross border exchange of goods face a multitude of new laws and initiatives in addition to the traditional array of responsibilities required by the US Bureau of Customs and Border Protection and Immigration and Customs Enforcement While these regulations are intended to strengthen border security without careful planning they may have the unfortunate result of hindering the efficient movement of goods In addition to updated customs forms and helpful appendices this third edition covers the burgeoning area of free trade agreements between the US and countries around the globe These agreements are a critical aspect of US bilateral trade relations affecting not only duty rates but also rules of origin and policies on investment trade in services and access to Government procurement markets In sum this book is an invaluable tool for a host of international trade professionals including in house counsel dealing with import export issues corporate logistic managers regulatory and compliance managers and import export specialists

Sokol,2004 With an increasing awareness amongst countries and development agencies of the importance of policies which facilitate and improve the flow of goods and services across borders this publication sets out 8 country case studies Bolivia Ghana Morocco Mozambique Peru Philippines Turkey Uganda examining improved customs administrative systems Such improvements can offer great benefits such as improved market access lowered tariffs reduced transportation costs and better communications Also an effective customs administration system can act as a catalyst for economic development These case studies highlight both the successes and failures of such customs administrative programmes and is a companion volume to the Customs Modernization Handbook ISBN 0821357514 **Trade and Transport Corridor Management Toolkit** Charles Kunaka, Robin Carruthers,2014-05-07 Trade and transport corridors major routes that facilitate the movement of people and goods between regions and between countries have existed for millennia They enable regions and countries to offer high capacity transport systems and services that reduce trade and transport costs by creating economies of scale Regional corridors are particularly important to landlocked countries often providing the only overland routes to regional and international markets Despite a long and complex history guidance is often lacking on how to design determine the components to include and analyze the impact of corridor projects The Trade and Transport Corridor Management Toolkit fills this void The Toolkit synthesizes the experiences of the World Bank and other development agencies in assessing designing implementing and evaluating the impact of trade and transport corridor projects It saves project developers the task of looking for the best available tools and ensures greater consistency to facilitate comparison and benchmarking The Toolkit will also be of immense value to policy makers in provincial and national governments as well as regional economic institutions for several reasons Corridors affect the space economy of countries they are best developed with clear estimates of the spatial impacts that can be expected A corridor system has multiple components including infrastructure roads railways ports transport and logistics services and regulations it is important to appreciate the linkages between them particularly as the overall performance of a corridor is determined by the weakest component Many parties with varying interests and motivations have a stake in corridor development The Toolkit argues for their full participation in corridor development processes and operations The best functioning modern corridors in the world did not happen by accident they are often the results of coordinated development and cooperation over many years The general principles outlined in this Toolkit should help project teams government officials logistics service providers and the trade community to better appreciate both the importance of good corridor project design and the challenges of and possibilities from improving corridor performance **The Impact of Modernisation on Trade Facilitation Initiatives in Zimbabwe** Gidion Mhuru,2020-04-22 Bachelor Thesis from the year
