## **Distance Learning:**

**Distance Learning** Marcia L. Williams, Kenneth Paprock, Barbara Covington, 1999 The landscape for higher education is changing rapidly and distance learning is a key element in this upheaval In this practical and timely volume authors Marcia L Williams Kenneth Paprock and Barbara Covington provide clear commentary on the basic issues surrounding distance learning Distance Learning answers some of the key questions at the heart of new educational technologies What are the options available to institutions considering the addition of distance learning to their programs What is the most practical way to integrate new technologies with existing equipment For teachers what is the best way to minimize the loss of content and foster a positive learning environment without face to face contact An ideal introduction to the world of new educational technologies the guide is filled with case studies and built on an intuitive set of How do I questions Providing a strong foundation for teachers who need to teach from a distance it will be an invaluable sourcebook for teachers who need to know more about open and distance learning across any academic discipline

**Teaching and Learning at a Distance** Michael R. Simonson, 2003 The second edition of this leading book offers everything readers need to know in order to make the experience of the distance learner as complete and satisfying as that of the local learner Here is concise to the point coverage of the foundations of the field and how it came to be dominated by the World Wide Web and the Internet And here is expansive practical hands on instruction in exactly how to do distance teaching through computer technology videotape or simple audio techniques Increased coverage of online learning provides specifics on designing delivering and evaluating online learning in every chapter Moreover the authors cover such hard to address topics as copyright protection and plagiarism and offer treatment of multiple instructional models suitable for distance education For distance teachers and learners

**Teaching and Learning at a Distance** Michael Simonson, Susan M. Zvacek, Sharon Smaldino, 2019-07-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include

recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field

The Distance Learning Playbook, Grades K-12 Douglas Fisher, Nancy Frey, John Hattie, Corwin, 2020-06-15 Effective teaching is effective teaching no matter where it occurs The pandemic teaching of mid 2020 was not really distance learning but rather crisis teaching But starting now teachers have the opportunity to prepare for distance learning with purpose and intent using what works best to accelerate students learning all the while maintaining an indelible focus on equity Harnessing the insights and experience of renowned educators Douglas Fisher Nancy Frey and John Hattie The Distance Learning Playbook applies the wisdom and evidence of VISIBLE LEARNING research to understand what works best with distance learning Spanning topics from teacher student relationships teacher credibility and clarity instructional design assessments and grading this comprehensive playbook details the research and evidence based strategies teachers can mobilize to deliver high impact learning in an online virtual and distributed environment This powerful guide includes Learning Intentions and Success Criteria for each module to track your own learning and model evidence based teacher practices for meaningful learning A diversity of instructional approaches including direct instruction peer learning and independent work that foster student self regulation and move learning to deep and transfer levels Discussion of equity challenges associated with distance learning along with examples of how teachers can work to ensure that equity gains that have been realized are not lost Special guidance for teachers of young children who are learning from a distance Videos of the authors and teachers discussing a wide variety of distance learning topics Space to write and reflect on current practices and plan future instruction The Distance Learning Playbook is the essential hands on guide to preparing and delivering distance learning experiences that are truly effective and impactful To purchase from an Authorized Corwin Distributor click here A Spanish translation of the Distance Learning Playbook Grades K 12 Aprendizaje a Distancia Guia Guia de Preescolar a Bachillerato can be purchased by contacting Irene Yopez from Editorial Trillas at [vigaexporta@trillas.mx](mailto:vigaexporta@trillas.mx) Accelerated Distance Learning: The New Way to

Articles are accepted from authors new and experienced with interesting and important information about the effective practice of distance teaching and learning. Distance Learning is published quarterly. Each issue includes eight to ten articles and three to four columns including the highly regarded And Finally column covering recent important issues in the field and written by Distance Learning editor Michael Simonson. Articles are written by practitioners from various countries and locations nationally and internationally.

*The Design and Management of Effective Distance Learning Programs* Disenza, Richard, Howard, Caroline, Schenk, Karen D., 2001-07-01. As computers, telecommunications technology, and other electronic media have reduced the constraints imposed by geographic location, increasing numbers of organizations are using information technology to geographically disperse education. And as the number of distance learning programs continues to increase, a variety of challenges and issues must be faced. These issues include costs incurred for remote space and equipment, the loss of traditional evaluation methods, and the potential losses of academic integrity. The goal of this book is to increase the understanding of such major issues, challenges, and solutions related to distance education, and it is geared toward administrators and academicians trying to develop or improve distance education programs.

**Humanizing Distance Learning** Paul Emerich France, 2020-11-06. In some ways, shouldn't we always be teaching from a distance? Paul France asks this not as a pitch for distance learning. But because part of the reason distance learning has been so challenging, Paul asserts, is that we're replicating long-standing practices that promote dependent learning in our students. Why not use this unique moment of time to reconnect with the true purpose of teaching to help our students become liberated learners and free thinkers? The next logical step in teachers' months-long distance learning journey, *Humanizing Distance Learning* describes how to center humanity and equity in our process of reimagining learning. Even while teaching and learning miles apart through screens, you'll discover how to build independence within your students so they're better equipped to tackle challenges with persistence and learn how to learn. Make collaboration and human connection essential components of your pedagogy, offering students the chance to socialize and learn from one another. Center and unpack students' identities, helping them develop a conscious knowledge of themselves all the while using their self-identified strengths to overcome any obstacles. Plan, prepare, and implement humanized instruction while teaching for student liberation, both digitally and in person. Investigate technology integration, including the Digital Divide, as well as ways to minimize EdTech integration so that our collective sense of humanity can continue to be front and center. The future, Paul writes, may be unclear, the road may be rocky, and the story may continue to be long and winding as we push forward through this global crisis. But the answer will always be simple: We must teach and learn in pursuit of a deeper sense of collective humanity, and for no other reason. This book is equal parts visionary and practical, courageous and invitational. It

addresses foundational needs and wrenching challenges teachers faced during the recent time when U S teachers abruptly found themselves teaching remotely It is a deeply humanizing book Carol Ann Tomlinson William Clay Parrish Jr Professor Emeritus University of Virginia Humanizing Distance Learning is a book for our times not only because it addresses how to build a culture of thinking and teach for understanding at a distance but also because it challenges the status quo of education by offering a more liberated and humane vision Ron Ritchhart Senior Research Associate Harvard Graduate School of Education Paul France has produced a timely and necessary book that will help educators humanize distance learning Recognizing incredible dimensions of complexity this book will surely help educators traverse times of uncertainty in distance learning H Richard Milner IV Cornelius Vanderbilt Chair of Education Vanderbilt University
