De La Puente, M.G. Rodd, 2014-05-23 One of the most important issues in the development of distributed computer control systems is the ability to build software and hardware which is both reliable and time deterministic this is an area where control engineering and computer science naturally meet This publication brings together the latest key papers on research and development in this field allowing cross fertilization between the two engineering disciplines involved and

allowing both academics and industrial practitioners to find new insights and learn from each other's views Distributed Computer Control Systems 1988 Th. d'Epina y Lalive, M.G. Rodd, 2014-06-28 Continuing the forward thinking of previously held distributed computer control systems meetings this volume discusses both the positive and negative views on trends in OSI based communications the development of the fieldbus the importance of the incorporation into basic real time operating systems to be used for distributed systems of concepts such as time stamping and access to global time bases and the influence of artificial intelligence based technologies on the distributed computer control world Distributed Computer Control Systems 1985 G. J. Suski, 2014-05-23 Focuses on recent advances in the theory applications and techniques for distributed computer control systems Topics covered include DCCS applications and case studies DCCS communications architectural considerations in DCCS DCCS tools for design and development DCCS communication management function and resource allocation in DCCS design methodologies for DCCS DCCS applications and systems Contains 22 papers

Distributed Computer Control Systems 1991 H. Kopetz, M.G. Rodd, 2014-07-04 Distributed computer control is at the intersection between control engineering and computer science Containing 22 papers this book provides an up to date reference source of important issues in the design and implementation of distributed real time computer systems

Distributed Computer Control Systems 1986 K.D. Muller, M.G. Rodd, 2014-05-23 This seventh IFAC workshop on distributed control systems DCCS discusses the ideas of real time synchronization and data consistency in industry with emphasis on the Manufacturing Automation Protocol MAP The volume also debates the gulf between the computer scientist's approach to language and the needs of the application programmer In addition to treating relevant topics each session has an introductory paper and a panel discussion to give a complete picture of the progress and research in this computer field today

Miller, 2014-05-20 Distributed Computer Control Systems 1981 covers the proceedings of the Third IFAC Workshop held in Beijing China on August 13 17 1981 The book focuses on the advancements of processes technologies and approaches employed in distributed computer control systems DCCS The selection first offers information on the summary report of the Third IFAC Workshop on Distributed Computer Control Systems and application of DCCS to the modernization of metal rolling mills Discussions focus on system architecture hot strip process software structuring and man machine interface The text then examines distributed microcomputer control systems for electrical power plants distributed versus centralized computer control systems of industrial continuous process and practical considerations for design and implementation of distributed digital control The text takes a look at the architectural considerations of DCCS and its use in scientific experiments Topics include system interaction software for the ECN architectural schemes of DCCS comparison of DCCS and multiprocessors generalization of the concept of parallelism and combined architectural realization of parallelism The partitioning and synchronization concepts for computing dynamical systems algorithms on distributed computer control networks and scheduling of DCCS for industrial robots are also

discussed The selection is a vital reference for readers interested in distributed computer control systems Distributed Computer Control Systems 1995 A.E.K. Sahraoui,J.A. de la Puente,2014-05-23 The series of IFAC Workshops on distributed computer control systems DCCS provide the opportunity for leading researchers and practitioners in the field to discuss and evaluate recent advances and current issues in theory applications and technology of DCCS DCCS 95 the 13th IFAC workshop in the series was held in Toulouse Blagnac France The topics covered at this meeting included the role of real time in DCCS specifications scheduling methods for DCCS real time distributed operating systems and databases and industrial applications and experience with DCSS *Distributed Computer Control Systems* ,1995 **Distributed Computer Control Systems 2000** A. Sowmya,J. Park,2001-05-04 This Proceedings contain the papers presented at the 16th IFAC Workshop on Distributed Computer Control Systems DCCS held in Sydney Australia in December 2000 Development of distributed computer control systems makes demands on the disciplines of computer science and engineering as well as electrical engineering and usually involves both hardware and software that is reliable and with assured timing properties The DCCS series of workshops contributes to this inter disciplinary area by bringing together academic researchers and practitioners who may normally not attend the same events During the past decade DCCS has focused on novel technologies for distributed control systems These papers fall in the areas of classical control theory computer architecture real time computer networks and formal methods for real time systems besides application papers in all of these areas Out of 34 submitted papers 24 were selected for presentation at the workshop *Distributed Computer Control Systems 1989* L. Motus,S. Narita,2014-07-04 The focus of the workshop was on recent advances in the theory applications and techniques for distributed computer control systems Topics included tools and methods for inner layers of DCCS application papers presenting operational DCCS the infiltration of true real time or time critical concepts and the emergence of artificial intelligence methods in DCCS applications leading to novel computer architectures being integrated in computer networks The book will be of interest not only to those involved in DCCS but also software engineers and distributed computing scientists Distributed Computer Control Systems 1998 (DCCS '98) International Federation of Automatic Control,1999 Computer control systems are increasingly required to be highly dependable and to have deterministic timing properties Distributed architectures have the potential to meet this challenge The advantages of distributed computer control systems include the possibility of composing large systems out of pre tested components with small integration effort their well defined fault containment properties and their capacity to make effective use of mass produced silicon chips The IFAC Workshop series on Distributed Computer Control Systems DCCS highlights and traces the growth of key concepts in this field at their various stages of development Theoretical and practice oriented viewpoints receive equal emphasis and there is a creative blending of the disciplines of computer science and control engineering The 1998 DCCS Workshop was notable for the attention given to true real time communication networks and protocols The complexity of the trade off between services
