Decision Making With Multiple Objectives:

Decisions with Multiple Objectives Ralph L. Keeney, Howard Raiffa, 1993-07 This book describes how a confused decision maker who wishes to make a reasonable and responsible choice among alternatives can systematically probe their thoughts and feelings in order to make the critically important trade offs between incommensurable objectives

Multi-Objective Decision Making Diederik M. Roijers, Shimon Whiteson, 2017-04-20 Many real world decision problems have multiple objectives For example when choosing a medical treatment plan we want to maximize the efficacy of the treatment but also minimize the side effects These objectives typically conflict e g we can often increase the efficacy of the treatment but at the cost of more severe side effects In this book we outline how to deal with multiple objectives in decision theoretic planning and reinforcement learning algorithms To illustrate this we employ the popular problem classes of multi objective Markov decision processes MOMDPs and multi objective coordination graphs MO CoGs First we discuss different use cases for multi objective decision making and why they often necessitate explicitly multi objective algorithms We advocate a utility based approach to multi objective decision making i e that what constitutes an optimal solution to a multi objective decision problem should be derived from the available information about user utility We show how different assumptions about user utility and what types of policies are allowed lead to different solution concepts which we outline in a taxonomy of multi objective decision problems Second we show how to create new methods for multi objective decision making using existing single objective methods as a basis Focusing on planning we describe two ways to creating multi objective algorithms in the inner loop approach the inner workings of a single objective method are adapted to work with multi objective solution concepts in the outer loop approach a wrapper is created around a single objective method that solves the multi objective problem as a series of single objective problems After discussing the creation of such methods for the planning setting we discuss how these approaches apply to the learning setting Next we discuss three promising application domains for multi objective decision making algorithms energy health and infrastructure and transportation Finally we conclude by outlining important open problems and promising future directions

Uncertain Multi-objective Decision Making: Methods and Industrial Models Hamed Fazlollahtabar,2026-01-01 This book explains multi objective optimization as an area of multicriteria decision making that deals with mathematical optimization problems

involving more than one objective function that must be optimized simultaneously Multi objective optimization is used in many fields of science including engineering economics and logistics where there is a need to make optimal decisions in the presence of trade offs between two or more conflicting objectives Uncertain optimization refers to contexts where there is uncertainty in models and data It potentially has various applications in different domains such as portfolio selection inventory management pollution reduction sustainable development resource allocation and reallocation and performance analysis The book encompasses various types of uncertainty in decision making namely fuzziness possibility Bayesian stochastic roughness vagueness and artificial intelligence and develops application areas in industrial cases It includes 12 chapters presenting multiobjective decision models under one of the uncertainty types In each chapter an implementation study is illustrated to show the applicability of the model

Multiobjective Decision Making Vira Chankong, Yacov Y Haimmes, 2008-02-04 This first rate text explores the theory and methodology of systems engineering in evaluating alternative courses of action and associated decision making policies It treats criteria as multidimensional rather than scalar in the development of normative theories These contribute to a behavioral theory of decision making and provide guidance for exercising judgment An introductory discussion of the systemic approach to judgment and decision is followed by explorations of psychological value measurements utility classical decision analysis and vector optimization theory The second section chiefly deals with methods of assessing and evaluating alternatives including both noninteractive and interactive methods A taxonomy and a comparative evaluation of methods conclude the text
