Everyday Arithmetic Franklin Sherman Hoyt, Harriet E. Peet, 1915 *One, Two, Three* David Berlinski, 2011-05-10 From the acclaimed author of *A Tour of the Calculus* and *The Advent of the Algorithm* here is a riveting look at mathematics that reveals a hidden world in some of its most fundamental concepts In his latest foray into mathematics David Berlinski takes on the simplest questions that can be asked What is a number How do addition subtraction multiplication and division actually work What are geometry and logic As he delves into these subjects he discovers and lucidly describes the beauty and complexity behind their seemingly simple exteriors making clear how and why these mercurial often slippery concepts are essential to who we are Filled with illuminating historical anecdotes and asides on some of the most fascinating mathematicians through the ages *One Two Three* is a captivating exploration of the foundation of mathematics how it originated who thought of it and why it matters

Epistemology Robert Audi, 2003 This comprehensive book introduces the concepts and theories central for understanding knowledge It aims to reach students who have already done an introductory philosophy course Topics covered include perception and reflection as grounds of knowledge and the nature structure and varieties of knowledge The character and scope of knowledge in the crucial realms of ethics science and religion are also considered Unique features of *Epistemology* Provides a comprehensive survey of basic concepts and major theories Gives an up to date account of important developments in the field Contains many lucid examples to support ideas Cites key literature in an annotated bibliography

Computer Graphics and Geometric Modelling Max K. Agoston, 2005-11-14 Possibly the most comprehensive overview of computer graphics as seen in the context of geometric modelling this two volume work covers implementation and theory in a thorough and systematic fashion *Computer Graphics and Geometric Modelling Implementation and Algorithms* covers the computer graphics part of the field of geometric modelling and includes all the standard computer graphics topics The first part deals with basic concepts and algorithms and the main steps involved in displaying photorealistic images on a computer The second part covers curves and surfaces and a number of more advanced geometric modelling topics including intersection algorithms distance algorithms polygonizing curves and surfaces trimmed surfaces implicit curves and surfaces offset curves and surfaces curvature

geodesics blending etc The third part touches on some aspects of computational geometry and a few special topics such as interval analysis and finite element methods The volume includes two companion programs *Reports of the Heads of Departments of the Commonwealth of Pennsylvania ...
