The United States and Arms Control Allan Krass, 1997-08-30 The United States has committed itself to an unprecedented number and variety of arms control and nonproliferation obligations in the past decade At least ten major new agreements have been signed since 1986 and some of them have now been in force for several years After a brief review of Cold War arms control and the lessons to be learned from it the book surveys the commitments the United States has made during the past decade across the full spectrum of arms control including nuclear conventional chemical and biological weapons It describes the bureaucratic structure the United States has created to implement its own commitments and to verify that other countries are complying with theirs The book then analyzes the costs and benefits of the new regimes the persistent problems encountered in managing them and the causes and appropriate responses to incidents of noncompliance It concludes with an argument for continued U S leadership in international arms control *Review of Arms Control and Disarmament Activities* United States. O'Hanlon, 2004-12-07 Arms control for decades at the core of the foreign policy consensus today is among the more contentious issues in American politics It is pilloried and considered out of mode in many conservative quarters while being viewed as nearly sacrosanct in many liberal circles In this new book Michael Levi and Michael O Hanlon argue that neither the left nor the right has a correct view of the proper utility of arms control in the age of terror Arms control in the traditional sense lengthy treaties to limit nuclear and other military competitions among the great powers is no longer particularly useful Nor should arms control be pursued as a means to the end of constraining the power of nations or of promoting global government It is still a critical tool though for controlling dangerous technologies particularly those that in the hands of hostile states or terrorist organizations could cause massive death and destruction Arms control and coercive action including military force must be integrated into an overall strategy for preventing proliferation now more than ever before Arms control should be used to gain earlier warning of illicit activities inside dangerous states allowing the international community to take coercive action in a timely way The authors propose three new criteria to guide future arms control efforts designed to respond to today's geopolitical realities Arms control must focus on the dangers of catastrophic technology not so much in the hands of major powers as of small states and terrorist groups Their criteria lead to a natural focus on nuclear and biological technologies Much tougher measures to prevent countries from gaining nuclear weapons technology while purportedly complying with the Nuclear Non Proliferation Treaty and procedures for controlling dangerous biological technologies will be most prominent in this framework while lower priority is given to efforts such as bilateral nuclear accords and most t
