Gnanamanickam,2007-09-29 The idea of developing a comprehensive volume on PLANT ASSOCIATED BACTERIA was born in my mind about 5 years back I decided therefore that the proposed volume on Plant Associated Bacteria will be a complete volume on plant bacteriology There are several books on symbiotic and beneficial bacteria There are also books and volumes on plant pathogenic bacteria In recent years the plant growth promoting rhizobacteria PGPR has emerged as an important group which has significant applications to crop production and biological disease control There is a vital need for a comprehensive volume on all plant associated bacteria that also includes epiphytic and endophytic bacteria In my mind the proposal appeared worthwhile and timely In the present era of genomics there has been an enhanced interest in the genomics of the plant associated bacteria Example the Plant Associated Microbe Genome Initiative American Phytopathological Society [www.apsnet.org media ps top asp](http://www.apsnet.org/media/ps_top.asp) Traditional methods of identification of bacteria have been replaced by molecular methods for diagnostics and their phylogeny This volume tries to carefully document both the traditional and recent methods To achieve this the contributors have been chosen from among the best experts to provide updated information for a reader who has specific expectations in a volume of this nature

biogas from biomass and sewage sludge for zero waste production This is aimed to also integrate the issue of energy demand and the one of energy production Proton Exchange Membrane Fuel Cells Inamuddin, Omid Moradi, Mohd Imran Ahamed, 2023-02-10 PROTON EXCHANGE MEMBRANE FUEL CELLS Edited by one of the most well respected and prolific engineers in the world and his team this book provides a comprehensive overview of hydrogen production conversion and storage offering the scientific literature a comprehensive coverage of this important fuel Proton exchange membrane fuel cells PEMFCs are among the most anticipated stationary clean energy devices in renewable and alternative energy Despite the appreciable improvement in their cost and durability which are the two major commercialization barriers their availability has not matched demand This is mainly due to the use of expensive metal catalyst less durable membranes and poor insight into the ongoing phenomena inside proton exchange membrane fuel cells Efforts are being made to optimize the use of precious metals as catalyst layers or find alternatives that can be durable for more than 5000 hours Computational models are also being developed and studied to get an insight into the shortcomings and provide solutions The announcement by various companies that they will be producing proton exchange membrane fuel cells based cars by 2025 has accelerated the current research on proton exchange membrane fuel cells The breakthrough is urgently needed The membranes catalysts polymer electrolytes and especially the understanding of diffusion layers need thorough revision and improvement to achieve the target This exciting breakthrough volume explores these challenges and offers solutions for the industry Whether for the student veteran engineer new hire or other industry professionals this is a must have for any library
