Complete Musical Analysis A. J. Goodrich, 2015-06-15 Excerpt from Complete Musical Analysis A System Designed to Cultivate the Art of Analyzing and Criticising and Assist in the Performance and Understanding of the Works of the Great Composers of the Different Epochs Among the vast army of music students busily engaged in acquiring technical skill in manipulating instruments and voices there are comparatively few who cultivate the critical faculties in listening properly to music or have sufficient analytical knowledge to enable them to name and classify a composition after a single hearing Some interesting books have been written in which certain music is recommended to be performed for pupils but listening to music is an art and can be acquired only through a systematic series of exercises and instructions unless one is content to wait for the gradual absorption of this information through a professional career of many years Acknowledgment is also made of the fact that even in small cities one may have the privilege of listening to the greatest artists including such birds of passage as von Biilow Rubinstein d Albert Klindworth Rosenthal Essipoff and Aus der Ohe But in truth considerable of this heavy cannonading is so to say fired over the heads of the average student Every embryo pianist is improved by hearing a recital by any of these artists but in the majority of cases they should descend somewhat from their lofty pedestal to the common earth upon which the student stands if others than advanced students are to be hit by their artistic missiles But it is often impossible for these distinguished virtuosi who in addition to their inherent gifts have enjoyed every possible advantage to comprehend the chaotic state of musical culture outside the radius of our large cities The text books the laws of the country which permit the titles of Professor and Doctor to be bestowed upon persons who are ignorant of the very nomenclature of music and that spirit of American impatience which seeks to acquire everything by a patent

Complete Musical Analysis A. J. Goodrich, 1976-01-01 **Musical Performance** Guerino Mazzola, 2010-11-16 This book is a first sketch of what the overall field of performance could look like as a modern scientific field but not its stylistically differentiated practice pedagogy and history Musical performance is the most complex field of music It comprises the study of a composition s expression in terms of analysis emotion and gesture and then its transformation into embodied reality turning formulaic facts into dramatic movements of human cognition Combining these components in a creative way is a sophisticated mix of knowledge and mastery which more resembles the cooking of a delicate recipe than a rational procedure This book is the first one aiming at such comprehensive coverage of the topic and it does so also as a university text book We include musicological and philosophical aspects as well as empirical performance research Presenting analytical tools and case studies turns this project into a demanding enterprise in construction and experimental setups of performances especially those generated by the music software Rubato We are happy that this book was written following a course for performance students at the School of Music of the University of Minnesota Their education should not be restricted to the canonical practice They must know the rationale for their performance It is not sufficient to learn performance with the old fashioned imitation model of the teacher s antetype this cannot be an exclusive tool since it dramatically lacks the poetical precision asked for by Adorno s and Benjamin s micrologic Without such alternatives to intuitive imitation performance risks being
