## Current Topics In Complex Algebraic Geometry:

Current Topics in Complex Algebraic Geometry Charles Herbert Clemens, Janos Kollár, 1995 The 1992-93 academic year at the Mathematical Sciences Research Institute was devoted to complex algebraic geometry This volume collects survey articles that arose from this event which took place at a time when algebraic geometry was undergoing a major change The editors of the volume Herbert Clemens and Janos Kollár chaired the organizing committee This book gives a good idea of the intellectual content of the special year and of the workshops Its articles represent very well the change of direction and branching out witnessed by algebraic geometry in the last few years

*Games of No Chance 4* Richard J. Nowakowski, 2015-04-16 Combinatorial games are the strategy games that people like to play for example chess Hex and Go They differ from economic games in that there are two players who play alternately with no hidden cards and no dice These games have a mathematical structure that allows players to analyse them in the abstract *Games of No Chance 4* contains the first comprehensive explorations of misère last player to move loses games extends the theory for some classes of normal play last player to move wins games and extends the analysis for some specific games It includes a tutorial for the very successful approach to analysing misère impartial games and the first attempt at using it for misère partisan games Hex and Go are featured as well as new games Toppling Dominoes and Maze Updated versions of *Unsolved Problems in Combinatorial Game Theory* and the *Combinatorial Games Bibliography* complete the volume
