Current Topics in Management M. Afzalur Rahim, 2007 *Current Topics in Management* presents basic research on the theory and practice of management and administration. Volume 12 contains eleven contributions divided into four sections. The editor explains the volume in Chapter 1 while the other chapters were the survivors of competitive reviews of 124 submissions to the thirteenth annual International Conference on Advances in Management held at Lisbon, Portugal. Part 1: Managing Evolution and Transformation contains three chapters that deal with organizational transformation through reengineering for improving business processes, an organizing framework for the emergence of new organizational forms and concepts, and forms of do-it-yourself in organizations which involve creative use of resources to deal with a problem. Part 2: Managing Inappropriateness deals with some unusual situations, managing global imbalances that require cooperation and commitment from all countries, and one of the most important contemporary phenomena: misrepresentation or radical distortion of reality. Part 3: Issues in Strategic Management focuses on the relationships of board of directors, attributes, conflict, and shared mental models to board effectiveness, controlling CEO compensation through an independent board of directors, and ecologically responsive behavior of corporate actors. The final part: Entrepreneurship and Behavior in Organizations concentrates with an opportunity-based approach to the theory and research in entrepreneurial discovery, research, a study of the moderating effects of goal commitment, task feedback, and reward for competence on the relationship between work overload and creativity, and guidelines to managers for the diagnosis of the spiritual health and intervention to enhance spirituality at work. This volume will be of interest to corporate libraries, advanced students in management and administration, economists, and labor studies specialists. It is the official publication of the Center for Advanced Studies in Management.

Lelieveld, Yasmine Motarjemi, 2013-11-01 *Food Safety Management: A Practical Guide for the Food Industry* with an Honorable Mention for Single Volume Reference Science in the 2015 PROSE Awards from the Association of American Publishers is the first book to present an integrated practical approach to the management of food safety throughout the production chain. While many books address specific aspects of food safety, no other book guides you through the various risks associated with each sector of the production process or alerts you to the measures needed to mitigate those risks. Using practical examples of incidents and their root causes, this book highlights pitfalls in food safety management and provides key insight into the means of avoiding them. Each section addresses its subject in terms of relevance and application to food safety and where applicable, spoilage. It covers all types of risks, e.g., microbial, chemical, physical, associated with each step of the food chain. The book is a reference for food safety managers in different sectors, from primary producers to processing, transport, retail, and distribution, as well as the food services sector. Honorable Mention for Single Volume
