

A network diagram consisting of several glowing blue spheres (nodes) connected by glowing blue lines. The nodes are arranged in a roughly triangular pattern, with one node at the bottom right and others branching out towards the top left. The background is a dark, textured surface with a grid pattern, possibly representing a floor or a digital plane. The overall aesthetic is futuristic and technological.

*Computer Graphics* James D. Foley,1996 On computer graphics Computer Graphics Programming G. Enderle,K. Kansy,G. Pfaff,2012-12-06 For several years the authors of this book have been involved in the design and the national and international review of the forthcoming graphical standard When the end of this process could be foreseen and the International Standard Graphical Kernel System GKS was cast into its final form the urgent need arose for detailed information to the graphics community about this standard and for the education of graphics programmers One major goal of GKS besides the portability of graphical application programs and the device independence is programmer portability by establishing a common base for training of graphics programmers Having accompanied the path of GKS from the very early stages of defining the basic concepts and designing its first versions up to the final draft of the International Standard we felt it worthwhile to start the venture of a text book on computer graphics programming based on GKS This book is aimed at one hand at graphics users experts and managers who want to get an overview of the new standard and a better understanding of its concepts On the other hand it addresses the graphics programmers who want to use GKS for realizing their graphical applications It can serve as the base for teaching and studying functions concepts and methods of GKS Additionally it will be a valuable source of information for implementors of GKS

*Computer Graphics Programming* Günter Enderle,Klaus Kansy,Günther Pfaff,2012-12-06 TO COMPUTER GRAPHICS BASED ON GKS Part I gives an introduction to basic concepts of computer graphics and to the principles and concepts of GKS The aims of this part are twofold to provide the beginner with an overview of the terminology and concepts of computer graphics based on GKS and to

give the computer graphics expert an introduction to the GKS standard In the early chapters of this part the main areas of computer graphics the various classes of computer graphics users the interfaces of GKS and its underlying design concepts are discussed and important terms are defined The later chapters give an informal introduction to the main concepts of GKS and their interrelationships output attributes coordinate systems transformations input segments metafile state lists and error handling This introduction to the GKS framework will prepare the ground for the detailed description of 2D GKS functions in Part III and the 3D extensions to GKS in Part IV
