**Creating Societies** Dirk Hoerder,2000-01-01 Dirk Hoerder shows us that it is not shining railroad tracks or statesmen in Ottawa that make up the story of Canada but rather individual stories of life and labour Caribbean women who care for children born in Canada lonely prairie homesteaders miners in Alberta and British Columbia women labouring in factories Chinese and Japanese immigrants carving out new lives in the face of hostility Hoerder examines these individual experiences in *Creating Societies* the first systematic overview of the total Canadian immigrant experience Using letters travel accounts diaries memoirs and reminiscences he brings the immigrant s experiences to life Their writings often recorded for grandchildren neighbours and sometimes a larger public show how immigrant lives were entwined with the emerging Canadian society Hoerder presents an important new picture of the emerging Canadian identity dispelling the Canadian myth of a dichotomy between national unity and ethnic diversity and emphasizing the long standing interaction between the members of a different ethnic groups *Minds Make Societies* Pascal Boyer,2018-05-08 A scientist integrates evolutionary biology genetics psychology economics and more to explore the development and workings of human societies There is no good reason why human societies should not be described and explained with the same precision and success as the rest of nature Thus argues evolutionary psychologist Pascal Boyer in this uniquely innovative book Integrating recent insights from evolutionary biology genetics psychology economics and other fields Boyer offers precise models of why humans engage in social behaviors such as forming families tribes and nations or creating gender roles In fascinating thought provoking passages he explores questions such as Why is there conflict between groups Why do people believe low value information such as rumors Why are there religions What is social justice What explains morality Boyer provides a new picture of cultural transmission that draws on the pragmatics of human communication the constructive nature of memory in human brains and human motivation for group formation and cooperation Cool and captivating It will change forever your understanding of society and culture Dan Sperber co author of *The Enigma of Reason* It is highly recommended to researchers firmly settled within one of the many single disciplines in question Not only will they encounter a wealth of information from the humanities the social sciences and the natural sciences but the book will also serve as an invitation to look beyond the horizons of their own fields Eveline Seghers *Evolutionary Studies in Imaginative Culture* [How to Make Societies Thrive?
