Plotkin, 2020 The Amazon is a land of superlatives The complex ecosystem covers an area about the size of the continental U S The Amazon River discharges 57 million gallons of water per second in two hours this would be enough to supply all of New York City s 7.5 million residents with water for a year Its flora and fauna are abundant Approximately one of every four flowering plant species on earth resides in the Amazon A single Amazonian river may contain more fish species than all the rivers in Europe combined It is home to the world s largest anteater armadillo freshwater turtle and spider as well as the largest rodent which weighs over 200 lbs catfish 250 lbs and alligator more than half a ton The rainforest which contains approximately 390 billion trees plays a vital role in stabilizing the global climate by absorbing massive amounts of carbon dioxide or releasing it into the atmosphere if the trees are destroyed Severe droughts in both Brazil and Southeast Asia have been linked to Amazonian deforestation as have changing rainfall patterns in the U S Europe and China The Amazon also serves as home to millions of people Approximately seventy tribes of isolated and uncontacted people are concentrated in the western Amazon completely dependent on the land and river These isolated groups have been described as the most marginalized peoples in the western hemisphere with no voice in the decisions made about their futures and the fate of their forests In this addition to the What Everyone Needs to Know series ecologist and conservation expert Mark J Plotkin who has spent 40 years studying Amazonia its peoples flora and fauna The Amazon offers an engaging overview of this irreplaceable ecosystem and the challenges it
