Amber Window To The Past:

Amber David A. Grimaldi, 1996 An illustrated examination of amber fossilized translucent tree resin [Ancient DNA](#)
Elizabeth D Jones, 2022-02-22 The untold story of the rise of the new scientific field of ancient DNA research and how Jurassic Park and popular media influenced its development Ancient DNA research the recovery of genetic material from long dead organisms is a discipline that developed from science fiction into a reality between the 1980s and today Drawing on scientific historical and archival material as well as original interviews with more than fifty researchers worldwide Elizabeth Jones explores the field s formation and explains its relationship with the media by examining its close connection to de extinction the science and technology of resurrecting extinct species She reveals how the search for DNA from fossils flourished under the influence of intense press and public interest particularly as this new line of research coincided with the book and movie Jurassic Park Ancient DNA is the first account to trace the historical and sociological interplay between science and celebrity in the rise of this new research field In the process Jones argues that ancient DNA research is more than a public facing science it is a celebrity science **New York Magazine** , 1996-04-01 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Twelve Trees** Daniel Lewis, 2024-03-12 A compelling global exploration of nature and survival as seen via a dozen species of trees offering extensive insight into the ways in which humans and trees are interconnected BookPage revealing the challenges facing our planet and how scientists are working urgently to save our forests and our future The world today is undergoing the most rapid environmental transformation in human history from climate change to deforestation Scientists ethnobotanists indigenous peoples and collectives of all kinds are closely studying trees and their biology to understand how and why trees function individually and collectively in the ways they do In Twelve Trees Daniel Lewis curator and historian at one of the world s most renowned research libraries travels the world to learn about these trees in their habitats Lewis takes us on a sweeping journey to plant breeding labs botanical gardens research facilities deep inside museum collections to the tops of tall trees underwater and around the Earth journeying into the deserts of the American west and the deep jungles of Peru to offer a globe spanning perspective on the crucial impact trees have on our entire planet When a once common tree goes extinct in the wild but survives in a botanical garden what happens next How can scientists reconstruct lost genomes and habitats How does a tree store thousands of gallons of water or offer up perfectly preserved insects from millions of years ago or root itself in muddy swamps and remain standing How does a 5 000 year old tree manage to live and what can we learn from it And how can science account for the survival of one species at the expense of others Twelve Trees brims with wonder appreciation and

even some small hope Booklist and is an awe inspiring story of our world its past and its future Note species include The Lost Tree of Easter Island Sophora toromiro The coast redwood Sequoia sempervirens Hymenaea protera a fossil tree The Longleaf pine Pinus palustris East Indian sandalwood Santalum album The Bristlecone pine Pinus longaeva West African ebony Diospyros crassiflora The Tasmanian blue gum eucalyptus Eucalyptus globulus Olive tree Olea europaea Baobab Adansonia digitata the kapok tree Ceiba pentandra The bald cypress Taxodium distichum

The Real Science Behind the X-Files Anne Simon, 2001 Could an alien organism really survive a centuries long trip on a meteor and remain virulent enough to attack a human being How would a scientist know she was peering at a microbe from another planet What s the possibility of a genetically mutated monster actually developing In a gripping exploration of the facts behind the science fiction that has enthralled millions of X philes Anne Simon the respected virologist who comes up with the science for many intriguing episodes discusses telomeres cloning the Hayflick limit nanotechnology endosymbionts lentiviruses and other strange phenomena that have challenged the intellect and threatened the lives and sanity of America s favorite FBI agents With Simon s extraordinary gift for explaining complicated cutting edge science in a light accessible style and her behind the scenes commentary on the development of various plot lines The Real Science Behind the X Files will appeal to science buffs and X Files aficionados alike

Natural History, 1996 **Material Approaches to Roman Magic** Adam Parker, Stuart McKie, 2018-04-30 This second volume in the new TRAC Themes in Roman Archaeology series seeks to push the research agendas of materiality and lived experience further into the study of Roman magic a field that has until recently lacked object focused analysis Building on the pioneering studies in Boschung and Bremmer s 2015 Materiality of Magic the editors of the present volume have collected contributions that showcase the value of richly detailed context specific explorations of the magical practices of the Roman world By concentrating primarily on the Imperial period and the western provinces the various contributions demonstrate very clearly the exceptional range of influences and possibilities open to individuals who sought to use magical rituals to affect their lives in these specific contexts something that would have been largely impossible in earlier periods of antiquity Contributions are presented from a range of museum professionals commercial archaeologists university academics and postgraduate students making a compelling case for strengthening lines of communication between these related areas of expertise

Breviora, 1952 Papéis Avulsos de Zoologia, 2000 **The Coleopterists' Bulletin**, 2000 Museum Premieres, Exhibitions & Special Events, 1998 The Writers Directory, 2013 Antiquity, 1996 Includes section Reviews *Biennial Report* American Museum of Natural History, 1994 **Annual Report** California Academy of Sciences, 1996 **Journal of Polish Entomological Society**, 1998 *San Francisco Focus*, 1997 **Ecology** Manuel Carl Molles, 1999 This introductory general ecology text features a strong emphasis on helping students grasp the main concepts of ecology while keeping the presentation more applied than theoretical An evolutionary perspective forms the foundation of the entire discussion The book begins with the natural history of the planet considers

portions of the whole in the middle chapters and ends with another perspective of the entire planet in the concluding chapter
Its unique organization of focusing only on several key concepts in each chapter sets it apart from the competition *The
